Implementing Reproducible Research Victoria Stodden, Friedrich Leisch, Roger D. Peng, 2014-04-14 In computational science reproducibility requires that researchers make code and data available to others so that the data can be analyzed in a similar manner as in the original publication Code must be available to be distributed data must be accessible in a readable format and a platform must be available for widely distributing the data and code In addition both data and code need to be licensed permissively enough so that others can reproduce the work without a substantial legal burden *Implementing Reproducible Research* covers many of the elements necessary for conducting and distributing reproducible research It explains how to accurately reproduce a scientific result Divided into three parts the book discusses the tools practices and dissemination platforms for ensuring reproducibility in computational science It describes Computational tools such as Sweave knitr VisTrails Sumatra CDE and the Declaratron system Open source practices good programming practices trends in open science and the role of cloud computing in reproducible research Software and methodological platforms including open source software packages RunMyCode platform and open access journals Each part presents contributions from leaders who have developed software and other products that have advanced the field Supplementary material is available at www.ImplementingRR.org

The Radical Fifties Sophie Scott-Brown, 2025-06-12 The 1950s are usually portrayed as conservative conformist and apathetic but was there more to this much maligned decade than that In Britain the convergence of conflicting political moments the Cold War the Bomb the rise of America the decline of the empire welfare and affluence compelled a rapid rethinking of what it meant to be political along with a series of experiments in democracy and democracy education *The Radical Fifties* examines the distinctive activist politics emerging from this by focusing on the entwined histories of its main protagonists the Freedom Press anarchists the New Left Club socialists and the Direct Action Committee pacifists Instead of gaining or influencing power in a traditional sense these groups wanted to dispense with it all together and transform democracy into a whole way of life a quality of interaction between people While this upturned conventional political thinking it also posed a dilemma conceding the practice of democracy also meant conceding the ability to determine its ends and direct its activities In contrast to the assertive radicalism of the sixties this appeared dismally unambitious yet it confronted more directly and seriously the defining questions of the times could democratic means produce democratic ends If not was it still democracy

Coloniality of Power Alexander I. Stingl, 2015-12-16 Trouble is afoot in Digital Culture and Nerdland These are Alexander I Stingl claims not the engine of freedom and democracy that they once were hailed to be this much is already clear in the wake of the snooping and surveillance crises that broke in recent years Digitalization is but another version of the coloniality of power and being that has been at work for decades and centuries He poses the question whether Digital Age possess the legitimacy that digitalization has claimed His response is critically realistic but he doesn't stop at a critique for criticism's sake Inspired by the ideas of decolonial scholars feminist science studies current biological and neuro cognitive research and sociologists capable of reflection and self criticism Stingl attempts to break the canvas of sociology and show that adding a third and decolonial dimension to the two dimensional sociological imagination is indeed possible He illustrates that it is possible that classrooms free speech on internet and the inequalities in the production and distribution of a new form of social capital digital cultural health care capital can be subjected to a decolonial perspective along a sociological line of inquiry if sociologists allow for relations with other disciplines and scholarship to be integrative conversations The goal of this book is not to offer results or closed arguments but to create instead platforms for thinking further opening new lines of inquiry and to argue that it is not enough to identify problems or to attempt solve the problems with politics or best practice solutions Instead he proposes we must learn to identify and make use of the opportunities that are produced by any problem Stingl's conclusion is in short that a sociology that takes the decolonial challenge and critique seriously can not be a sociological sub discipline or a sociology of a problem but it must be a sociology of opportunities **The ^AOxford**
