Drucker, 2014-07-31 Alfred C Kinsey's revolutionary studies of human sexual behavior are world renowned His meticulous methods of data collection from comprehensive entomological assemblies to personal sex history interviews raised the bar for empirical evidence to an entirely new level In *The Classification of Sex* Donna J Drucker presents an original analysis of Kinsey's scientific career in order to uncover the roots of his research methods She describes how his enduring interest as an entomologist and biologist in the compilation and organization of mass data sets structured each of his classification projects As Drucker shows Kinsey's lifelong mission was to find scientific truth in numbers and through observation and to record without prejudice in the spirit of a true taxonomist Kinsey's doctoral work included extensive research of the gall wasp where he gathered and recorded variations in over six million specimens His classification and reclassification of Cynips led to the speciation of the genus that remains today During his graduate training Kinsey developed a strong interest in evolution and the links between entomological and human behavior studies In 1920 he joined Indiana University as a professor in zoology and soon published an introductory text on biology followed by a coauthored field guide to edible wild plants In 1938 Kinsey began teaching a noncredit course on marriage where he openly discussed sexual behavior and espoused equal opportunity for orgasmic satisfaction in marital
