Life Sciences Memo Grade 11 November 2014:

The Bleeding Edge Bob Hughes, 2016-10-17 Capitalism likes us to believe in the steady inevitable march of progress from the abacus to the iPad But the historical record tells of innumerable roads not taken all of which could have led to better more equal worlds and still can Academic and activist Bob Hughes puts flesh on the bones of the idea that another world is possible using as evidence the technology that capitalism claims as quintessentially its own the computer in all its forms Contrary to popular belief capitalism does not do innovation well instead suppressing or appropriating it This book shows that great innovations have never emerged from capitalism per se but always from the utopian moments that occur behind the capitalist s back And when it does embrace an innovation the results are often the diametric opposite of what the innovators intended In this thorough and meticulous work Hughes argues that if we only prioritized equality over materialism then superior and more diverse technologies would emerge leading to a richer more sustainable world Bob Hughes is an academic activist and author Formerly he taught electronic media Oxford Brookes University and now spends his time researching and campaigning against inequality He is author of *Dust or Magic* a book for digital multimedia workers about how people do good stuff with computers He is a member of No One is Illegal which campaigns for the total abolition of immigration controls for whom he has written many articles

All We Want Michael Harris, 2025-04-01 Our lives are defined by a story of endless growth and consumption Now a climate crisis demands that we change Can we write new stories In *All We Want* award winning author Michael Harris dismantles our untenable consumer culture and delivers surprising heartwarming alternatives Drawing on the wisdom of philosophers scientists and artists Harris uncovers three realms where humans have always found deeper meaning the worlds of Craft the Sublime and Care Past attempts to blunt our impact on the environment have simply redirected our consumption we bought fuel efficient cars and canvas tote bags We cannot however buy our way out of this crisis We need instead compelling new stories about life s purpose Part meditation and part manifesto *All We Want* is a blazing inquest into the destructive and unfulfilling promise of our consumer society and a roadmap toward a more humane future

Digital Cash Finn Brunton, 2019-06-25 The fascinating untold story of digital cash and its creators from experiments in the 1970s to the mania over Bitcoin and other cryptocurrencies Bitcoin may appear to be a revolutionary form of digital cash without precedent or prehistory In fact it is only the best known recent experiment in a long line of similar efforts going back to the 1970s But the story behind cryptocurrencies like Bitcoin and its blockchain technology has largely been untold until now In *Digital Cash* Finn Brunton reveals how technological utopians and political radicals created experimental money to bring about their visions of the future protecting privacy or bringing down governments preparing for apocalypse or launching a civilization of innovation and abundance that would make its creators immortal The incredible story of the pioneers of cryptocurrency takes us from autonomous zones on the high seas to the world s most valuable dump from bank runs to idea coupons from time travelers in a San Francisco bar to the pattern

securing every twenty dollar bill and from marketplaces for dangerous secrets to a tank of frozen heads awaiting revival in the far future Along the way Digital Cash explores the hard questions and challenges that these innovators faced How do we learn to trust and use different kinds of money What makes digital objects valuable How does currency prove itself as real to us What would it take to make a digital equivalent to cash something that could be created but not forged exchanged but not copied and which reveals nothing about its users Filled with marvelous characters stories and ideas Digital Cash is an engaging and accessible account of the strange origins and remarkable technologies behind today s cryptocurrency explosion

Long-Range Dependent Processes: Theory and Applications Ming Li, Carlo Cattani, 2022-12-05 **Global Social Policy** Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels Exiled in East Germany Sebastian Pampuch, 2024-04-22 The presence of Africans in the German Democratic Republic is very rarely thought of in connection with the experience of exile Instead Africans in the GDR are predominantly viewed through the prism of educational and labor migration While such research has undoubtedly produced valuable insights it often fails to adequately account for the implicit Eurocentrism methodological nationalism and anti communist bias inherent in Western knowledge production This study offers a different approach Through biographical portrayal it unfolds the life stories of African freedom fighters who lived in exile in the GDR and ultimately remained in reunified Germany with the main case study being a Malawian activist who was expelled from East to West Berlin Recounting his experiences along with those of some South African exiles chief among them a former medical worker for the ANC s armed wing the study ethnographically reconstructs the multiple entanglements between the Second and Third worlds from the vantage point of the politically displaced within the concrete historical contexts of African decolonization the struggle

against the Malawian Banda dictatorship and the struggle against South African apartheid 2024-05-29 12:34:56 *Nigeria - Politics, Religion, Pentecostal-Charismatic Power and Challenges* Akintayo Emmanuel, 2023-10-13

Nigeria presents an enthralling case study for understanding developing archetypes in interreligious encounters in Africa. The global community needs a cultural understanding and sensitivity for productive engagement with the Arab and non Arab Muslim world. The Nigeria religious exigencies provide a requisite intelligence into the challenges facing a global community seeking to foster peace. Without a domain of tolerance, love, equity and justice, Nigeria will continually be immured by pessimism, parochialism, cynicism and mutual suspicion. Despite being the largest economy in Africa and the most populous Black country, Nigeria demonstrates incessantly an uncommon fault line between Christianity and Islam. The significance of this goes beyond the borders of Nigeria but has become a global showcase anywhere the two religions exist. Contemporaneously, Nigeria is the nexus between west and central Africa. Rooted in the dusty Sahel of the north, the savannah plains, the rich rainforests of the Atlantic coast, the rocky hills of the West and the oil filled swamps of the Delta, Nigeria is the beauty, sound, vision, passion and the soul of the African continent. In Nigeria, the Nigeria Pentecostal Charismatic Movement possesses a distinctive flair that demands a holistic understanding of the movement's historical, cultural, fundamental and religious dimensions in a multifarious religious landscape. The disquisition of the movement's political cognizance, identity, power, authority, theology, popular culture, ethics and missiological impact in northern Nigeria presents a fine embroidery of their trials, frustrations and challenges but inveterate in faith, hope and love that opens up innovative panoramas of peaceful, dialogical prospects and coexistence between Christians and Muslims in northern Nigeria. In Nigeria, Politics, Religion, Pentecostal Charismatic Power and Challenges, Akintayo Emmanuel reconnoiters the complex missiological hindrances challenging the Nigerian Pentecostal Charismatic Movement. Their contextual missional landslide, disheveled with complicated paradoxes in the way the Christian majority have responded to Muslims in northern Nigeria, is anatomized. The Nigerian Pentecostal Charismatic Movement's puissance to solve some of Nigeria's political, ideological, cultural and spiritual dimensions of crisis and sectarian violence is achievable if the movement can mitigate her missiological hindrances. The responses of Nigerian Pentecostal Charismatic Movement to Nigeria's socio-political and ethno-religious complexities can construct a great future for the soul of Nigeria. They do not only have the capacity to provide the Christian alternatives to Nigeria's peculiarities; they can also stimulate Nigeria's deification among other nations by continuing to disentangle from unscrupulousness and atrociousness embedded within a reproach and opprobrium to any people. **The Schenley**

Experiment Jake Oresick, 2017-04-14. The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn and jazz virtuoso Earl

Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v Board of Education* Schenley succumbed to default segregation; during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008 citing over 50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school. A memorable important work of local and educational history, his book is a case study of desegregation, magnet education and the changing nature and legacies of America's oldest public schools.

Life in the Age of Drone Warfare Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical, juridical, geopolitical and cultural dimensions of drone technology and warfare. They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power. Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator. The contributors also explore drone warfare in relation to sovereignty, governance and social difference; provide accounts of the relationships between drone technologies and modes of perception and mediation; and theorize drones' relation to biopolitics, robotics, automation and art. Interdisciplinary and timely, *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war. Contributors: Peter Asaro, Brandon Wayne Bryant, Katherine Chandler, Jordan Crandall, Ricardo Dominguez, Derek Gregory, Inderpal Grewal, Lisa Hajjar, Caren Kaplan, Andrea Miller, Anjali Nath, Jeremy Packer, Lisa Parks, Joshua Reeves, Thomas Stubblefield, Madiha Tahir.

Dastardly Discourse Meg Gorzycki, 2020-03-09 Screaming at the television compulsively firing off tart little tweets and blogging until we are blue these signal that we are feeling the effects of dastardly discourse We live in a world where people feel entitled to use words to hurt exploit and publicly degrade humanity We daily consume rhetoric that makes a mockery of decency and civility Leaders of key social institutions including government news media and religious organizations who are supposed to be role models of reasoned and compassionate communication are often the ones with the loudest lies and the hardest hate We can change the channel We can unplug We can even encourage others to do the same We may not do so however until we grasp what is fundamentally at risk in our current norms of communication Nasty words are just the tip of the dastardly discourse iceberg What lies beneath is a steady flow of propaganda that aims to control our personal narratives This book is about that propaganda the importance of owning our own narratives and improving our own rhetorical capital the ability to analyze and evaluate information for the sake of sustaining human dignity decency and civility

The One Percent Solution Gordon Lafer, 2017-04-04 In the aftermath of the 2010 Citizens United decision it's become commonplace to note the growing political dominance of a small segment of the economic elite But what exactly are those members of the elite doing with their newfound influence The One Percent Solution provides an answer to this question for the first time Gordon Lafer's book is a comprehensive account of legislation promoted by the nation's biggest corporate lobbies across all fifty state legislatures and encompassing a wide range of labor and economic policies In an era of growing economic insecurity it turns out that one of the main reasons life is becoming harder for American workers is a relentless and concerted offensive by the country's best funded and most powerful political forces corporate lobbies empowered by the Supreme Court to influence legislative outcomes with an endless supply of cash These actors have successfully championed hundreds of new laws that lower wages eliminate paid sick leave undo the right to sue over job discrimination and cut essential public services Lafer shows how corporate strategies have been shaped by twenty first century conditions including

globalization economic decline and the populism reflected in both the Trump and Sanders campaigns of 2016 Perhaps most important Lafer shows that the corporate legislative agenda has come to endanger the scope of democracy itself For anyone who wants to know what to expect from corporate backed Republican leadership in Washington D C there is no better guide than this record of what the same set of actors has been doing in the state legislatures under its control **Hollywood**

Unions Kate Fortmueller, Luci Marzola, 2024-12-13 Hollywood Unions is a unique collection that tells the stories of the unions and guilds that have organized motion picture and television labor IATSE the DGA SAG AFTRA and the WGA The Hollywood unions represent a wide swath of the workers making media from directors and stars to grips and makeup artists People today know some of these organizations from their glitzy annual awards celebrations but the unions actual importance is in bargaining with the Association of Motion Picture and Television Producers AMPTP on behalf of 331 000 workers in the motion picture and television industry The Hollywood unions are not neutral institutions but rather have long histories of jurisdictional battles competitions with rival unions and industry altering strikes They have supported the industry s workers through the Great Depression World War II the McCarthy era the collapse of the studio system the rise of television runaway production fights for gender parity the digital revolution and a global pandemic The history of these unions has contributed to making media work sustainable in the long term and helped shape the conditions and production cultures of Hollywood *After the Education Wars* Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow
