*Debating Modern Medical Technologies* Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors Medical technologies often promise to extend and improve quality of life but come with many questions Are they safe and effective Are they worth the cost When should they be allowed on the market and when should Medicare Medicaid and private insurance companies be required to pay for drugs devices and diagnostic tests Using case studies of disputes about the value of mammography screening genetic testing for disease risk brain imaging technologies to detect biomarkers associated with Alzheimer's disease cell based therapies and new expensive drugs Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies physicians and patient advocates *Debating Modern Medical Technologies The Politics of Safety Effectiveness and Patient Access* reveals stakeholders differing values and interests regarding patient choice physician autonomy risk assessment government intervention in medicine and technology assessment and scientific innovation as a driver of national and global economies It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients The Damned Don't Cry - They Just Disappear

Harlan Greene, 2017-12-29 A biography of an unconventional Southern writer who illuminated gay life in the South In *The Damned Don't Cry They Just Disappear* literary historian and Lambda Award winning novelist Harlan Greene has created a portrait of a nearly forgotten southern writer unearthing information from archives rare books film libraries and small town newspapers Greene brings Harry Hervey 1900 1951 to life and explicates his works to reveal him as a hardworking writer and master of many genres bravely unwilling to

conform to conventional values As Greene illustrates Hervey s novels short stories nonfiction books and film scripts contain complex mixtures of history and thinly disguised homoerotic situations and themes They blend local color naturalism melodrama and psychological and sexual truths that provide a view to the circles in which he moved Living openly with his male lover in Savannah Georgia and Charleston South Carolina Hervey set novels in these cities that scandalized the locals and critics as well He challenged the sexual mores of his day sometimes subtly and at other times brazenly presenting texts that told one story to gay male readers while still courting a mainstream audience His novels and nonfiction may have been coded and thus escaped detection in their day but twenty first century readers can decipher them easily Greene also discusses Hervey s travel books and successful Hollywood scriptwriting as well as his use of exotic elements from Asian cultures The iconic film Shanghai Express starring Marlene Dietrich was based on one of his original stories He also wrote some of the first travel books on Indochina with descriptions of male and female prostitution and allusions to his own sexual adventures which still make for sensational reading today Despite Hervey s output and his perseverance in presenting gay characters and themes as openly as he could he has not been included in any survey of twentieth century gay writers Greene now rectifies this omission providing the first book length study of Hervey s life and work and the first scholarly attention to him in more than fifty years It furthers our understanding of gay life in the South as well as the impact of gay artists on popular culture in the first half of the twentieth century     *Subject Guide to Books in Print* ,1983
