**Gender Politics at Home and Abroad** Hyaewool Choi, 2020-07-30 Choi examines how global Christian networks facilitated the flow of ideas people and material culture shaping gendered modernity in Korea **So, You Want to Work with the Ancient and Recent Dead?** J. M. Bedell, 2015-10-06 A comprehensive career guide for young kids thinking about careers in the forensic sciences explores options ranging from archaeologists and morticians to coroners and taxidermists while outlining activity suggestions and references *In Their Place* Stephen Crossley, 2017-08-20 This book critiques how impoverished communities are represented by politicians the media academics and policy makers and how our understanding of these neighbourhoods is often misleadingly shaped by these stories The alleged behavioural failings of poor people have attracted a great deal of academic and political scrutiny Spatial inequalities are also well documented and poor neighbourhoods have been extensively researched However other spaces have been re imagined in different ways by politicians academics journalists and social reformers These imagined geographies include exoticised slums cities being reclaimed by nature the street and domestic spaces like the kitchen or even the bedroom *In Their Place* highlights how these spaces are represented and how these representations are deployed manipulating political and media discourses around the individuals and communities who live there These distortions are often used to keep people in their place by making sure everyone knows where the poor belong This book will reorient those interested in human geography away from deprived neighbourhoods and back to the foundational spaces where political decisions and poverty are made in Britain today

**Recent Advances in  $\gamma\delta$  T Cell Biology: New Ligands, New Functions, and New Translational Perspectives** Dieter Kabelitz, Julie Dechanet-Merville, 2016-02-16 Gamma delta T cells are a small subset of T lymphocytes in the peripheral circulation but constitute a major T cell population at other anatomical localizations such as the epithelial tissues In contrast to conventional T cells the available number of germline genes coding for T cell receptor TCR variable elements of T cells is very small Moreover there is a preferential localization of T cells expressing given Vgamma and Vdelta genes in certain tissues In humans T cells expressing the Vg9Vd2 encoded TCR account for anywhere between 50 and 95% of peripheral blood T cells whereas cells expressing non Vd2 genes dominate in mucosal tissues In mice there is an ordered appearance of T cell waves during embryonic development resulting in preferential localization of T cells expressing distinct VgammaVdelta genes in the skin the reproductive organs or gut epithelia The major function of T cells resides in local immunosurveillance and immune defense against infection and malignancy This is supported by the identification of ligands that are selectively recognized by the TCR As an example human Vgamma9Vdelta2 T cells recognize phosphorylated metabolites phosphoantigens that are secreted by many pathogens but can also be overproduced by tumor cells providing a basis for a role of these T cells in both anti infective and anti tumor immunity Similarly the recognition of endothelial protein C receptor by human non Vdelta2 T cells has recently been identified to provide a link for the role for such T cells in immunity against epithelial tumor cells and

cytomegalovirus infected endothelial cells In addition to classical functions such as cytokine production and cytotoxicity recent studies suggest that subsets of T cells can exert additional functions such as regulatory activity and quite surprisingly professional antigen presenting capacity It is currently not well known how this tremendous extent of functional plasticity is regulated and what is the extent of TCR ligand diversity Due to their non MHC restricted recognition of unusual stress associated ligands T cells have raised great interest as to their potential translational application in cell based immunotherapy Topics of this Research Focus include Molecular insights into the activation and differentiation requirements of T cells role of pyrophosphates and butyrophilin molecules for the activation of human T cells role of T cells in tumor immunity and in other infectious and non infectious diseases and many others We are most grateful to all colleagues who agreed to write a manuscript Thanks to their contributions this E book presents an up to date overview on many facets of the still exciting T cells Dieter Kabelitz Julie D chanet Merville      **Failing Families, Failing Science** Elaine

Ecklund,2016-08-30 Work life in academia might sound like a dream summers off year long sabbaticals the opportunity to switch between classroom teaching and research Yet when it comes to the sciences life at the top U S research universities is hardly idyllic Based on surveys of over 2 000 junior and senior scientists both male and female as well as in depth interviews *Failing Families Failing Science* examines how the rigors of a career in academic science makes it especially difficult to balance family and work Ecklund and Lincoln paint a nuanced picture that illuminates how gender individual choices and university and science infrastructures all play a role in shaping science careers and how science careers in turn shape family life They argue that both men and women face difficulties though differently in managing career and family While women are hit harder by the pressures of elite academic science the institution of science and academic science in particular is not accommodating possibly not even compatible for either women or men who want to raise families Perhaps most importantly their research reveals that early career academic scientists struggle considerably with balancing their work and family lives This struggle may prevent these young scientists from pursuing positions at top research universities or further pursuing academic science at all a circumstance that comes at great cost to our national science infrastructure In an era when advanced scientific research and education is more important than ever *Failing Families Failing Science* presents a compelling inside look at the world of the university scientists who make it possible and what universities and national science bodies can do to make a difference in their lives      *Nullifying God* H. Robert Wilson Ph.D.,2018-01-01 Evolution and Creation are in a spiritual battle Evolution scientists ignore dismiss and unequivocally reject Creation out of hand It is not science or fact as evolution is they say However *Nullifying God* shows that random Darwinian evolution does not have the direct evidence required to support the claim Not only that but it provides contrary evidence that evolution is biologically impossible Because that is the case evolution can only persist in the unchallengeable authority it needs to maintain its position by actively attempting to nullify its alternative Creation and therefore the Bible and God *Nullifying God* was

especially written to empower and benefit believers who are not familiar with science to show them that evolution cannot be fact and is not science It does so by 1 providing them with a core foundation of applied science principles to rationally question evolution s claims then 2 guiding them into solid clear knowledge of why evolution is biologically impossible and finally 3 presenting them with examples that document evolution s attempts to nullify God The bottom line is Biblical Creation is the only answer that explains life

What Makes a World-Class School and How We Can Get There James H. Stronge, Xianxuan Xu, 2017-06-15 For years students in the United States have lagged behind students in many other countries on such measures of achievement as the PISA and TIMSS assessments In an increasingly globalized world such a gap is worrisome Armed with statistics examples and cautionary tales from Scandinavia to Japan James H Stronge and Xianxuan Xu have written a book that can help educators better prepare students and close that gap In *What Makes a World Class School and How We Can Get There* you will find Careful analysis of recent international assessment results what they mean and what can be done to improve them In depth profiles of high achieving education systems around the globe their histories their lessons learned and what they can teach educators and policymakers in the United States Strategies for aligning successful educational approaches from international systems to U S schools which strategies to use in which subjects and with which students Transformative ideas for cultivating a truly world class system of schooling both simple and complex ways to raise the bar for all students no matter what their background Educators in every country must ensure that their students are as prepared as possible to lead a future generation of citizens This thought provoking and copiously researched book provides educators with a blueprint for radical improvement based on the hard learned experiences of their peers around the world

*The Precarious Generation* Judith Bessant, Rys Farthing, Rob Watts, 2017-05-08 This book draws on a wealth of evidence including young people s own stories to document how they are now faring in increasingly unequal societies like America Britain Australia France and Spain It points to systematic generational inequality as those born since 1980 become the first generation to have a lower standard of living than previous generations While governments and experts typically explain this by referring to globalization new technologies or young people s deficits the authors of this book offer a new political economy of generations which identifies the central role played by governments promoting neoliberal policies that exacerbate existing social inequalities based on age ethnicity gender and class The book is a must read for social science students human service workers and policy makers and indeed for anyone interested in understanding the impact of government policy over the last 40 years on young people

Archaea in the Environment: Views on Archaeal Distribution, Activity, and Biogeography Andreas Teske, Ricardo Amils, Gustavo Antonio Ramírez, Anna-Louise Reysenbach, 2021-05-03

Hosting States and Unsettled Guests Jennifer Riggan, Amanda Poole, 2024-02-06 As wealthy countries build walls to keep migrants out countries in the Global South are celebrated for their hospitality towards refugees *Hosting States and Unsettled Guests* asks the question did these policies enable refugees to consider their new country home Beginning in 2016 Ethiopia promoted local integration economic opportunities and access to education for refugees in order to encourage them to stay long term rather than migrate towards Europe But by 2020 a political overhaul and the outbreak of war in Northern Ethiopia foreclosed these opportunities particularly for Eritrean refugees in Ethiopia How did Eritrean refugees envision their future

in light of the discrepancy between promising policies and ongoing instability Using ethnographic interviews and participant observation with government officials NGOs and refugees in three camps in northern Ethiopia and Addis Ababa Jennifer Riggan and Amanda Poole explore refugee notions of progress care hope and futurity Caught at the intersection of teleological violence and temporal agency refugees endure the present and tenaciously produce a sense of the future even when their efforts to progress are repeatedly challenged An important read *Hosting States and Unsettled Guests* makes key empirical and theoretical contributions in forced migration studies East African studies anthropology and international education Riggan and Poole deftly shift the focus of refugee studies away from Europe to regions in the Global South to understand the violence of emerging forms of migration deterrence *Organizing Professionals* Gary Rhoades, 2025-04-15 Amidst unprecedented levels of union organizing in higher education Gary Rhoades combines the perspectives of a scholar and labor movement activist and leader to provide a comprehensive analysis of organizing campaigns and collective bargaining agreements for faculty contingent and tenure track graduate students and postdoc employees Academic employees are organizing and negotiating for respect for workers their work and the public value of higher education Rhoades analyzes how academic employees are shifting the imbalance of power between labor and management reducing the internal professional stratification between segments of the academic workforce and intersecting workplace issues with broader issues of equality public value and social justice and in the process organizing and negotiating for a new more progressive academy *Global Capitalism in Disarray* Andrés Solimano, 2017 Global capitalism is affected by the malaises of stagnation financial fragility increased income inequality growing wealth concentration at the top and a vanishing fair social contract This book focuses on the incidence of these phenomena in the US UK Greece Spain Chile South Africa Australia China and other countries The book looks at the effects of IMF ECB led austerity policies in Europe The book examines concrete country and global conditions combining theory country studies historical evidence and international comparative analysis The book also proposes new policy priorities to restore stability reduce inequality and consolidate democracy in 21st century capitalism **Prison and Social Death** Joshua M. Price, 2015-07 The United States imprisons more of its citizens than any other nation in the world To be sentenced to prison is to face systematic violence humiliation and perhaps worst of all separation from family and community It is to borrow Orlando Patterson's term for the utter isolation of slavery to suffer social death In *Prison and Social Death* Joshua Price exposes the unexamined cost that prisoners pay while incarcerated and after release drawing upon hundreds of often harrowing interviews conducted with people in prison parolees and their families Price argues that the prison separates prisoners from desperately needed communities of support from parents spouses and children Moreover this isolation of people in prison renders them highly vulnerable to other forms of violence including sexual violence Price stresses that the violence they face goes beyond physical abuse by prison guards and it involves institutionalized forms of mistreatment ranging from abysmally poor health care to routine practices that are

arguably abusive such as pat downs cavity searches and the shackling of pregnant women And social death does not end with prison The condition is permanent following people after they are released from prison Finding housing employment receiving social welfare benefits and regaining voting rights are all hindered by various legal and other hurdles The mechanisms of social death Price shows are also informal and cultural Ex prisoners face numerous forms of distrust and are permanently stigmatized by other citizens around them A compelling blend of solidarity civil rights activism and social research Prison and Social Death offers a unique look at the American prison and the excessive and unnecessary damage it inflicts on prisoners and parolees
