*An Age of Accountability* John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

### **Sustaining Depth and Meaning in School**

**Leadership** Emil Jackson, Andrea Berkeley, 2020-07-15 *Sustaining Depth and Meaning in School Leadership Keeping Your Head* concerns the emotional and psychological experience of school leadership in particular the felt experience of life as a headteacher It describes the pressures and rewards of the role together with some of the ways that school leaders successfully sustain and develop themselves and their teams in what has become an increasingly complex challenging and highly accountable role This book explores the personal experience of leading schools Part I provides an overview and analysis of current and historical trends in school leadership and offers some theoretical frameworks for making sense of these Part II then offers psychodynamic approaches to supporting and developing school leaders and the impact that trends

in executive education continue to have on this Part III looks at approaches to school leadership development more generally including team development influences from the business world the growth of mentoring and coaching as a leadership intervention the design and evaluation of leadership development programmes and a case study on whole system development The final word is given to ten serving headteachers and deputies and their leadership journeys This range of chapters concepts and perspectives will support school leaders to maintain an emotional equilibrium while navigating the multilayered tightrope of intrapsychic interpersonal and organizational dynamics inherent in school life Rooted in Jackson and Berkeley's belief that school leaders are likely to be at their best when they find their own unique and authentic way of taking up their leadership role this book is an accessible supportive and developmental contribution for all those involved in education leadership
