**The Bleeding Edge** Bob Hughes, 2016-10-17 Capitalism likes us to believe in the steady inevitable march of progress from the abacus to the iPad But the historical record tells of innumerable roads not taken all of which could have led to better more equal worlds and still can Academic and activist Bob Hughes puts flesh on the bones of the idea that another world is possible using as evidence the technology that capitalism claims as quintessentially its own the computer in all its forms Contrary to popular belief capitalism does not do innovation well instead suppressing or appropriating it This book shows that great innovations have never emerged from capitalism per se but always from the utopian moments that occur behind the capitalist's back And when it does embrace an innovation the results are often the diametric opposite of what the innovators intended In this thorough and meticulous work Hughes argues that if we only prioritized equality over materialism then superior and more diverse technologies would emerge leading to a richer more sustainable world Bob Hughes is an academic activist and author Formerly he taught electronic media Oxford Brookes University and now spends his time researching and campaigning against inequality He is author of *Dust or Magic* a book for digital multimedia workers about how people do good stuff with computers He is a member of No One is Illegal which campaigns for the total abolition of immigration controls for whom he has written many articles

***Failing Our Future*** Joshua R. Eyler,2024-08-27 An indictment of the grading system in American schools and colleges and a blueprint for how we can change it One of the most urgent and long standing issues in the US education system is its obsession with grades In *Failing Our Future* Joshua R Eyler shines a spotlight on how grades inhibit learning cause problems between parents and children amplify inequities and contribute to the youth mental health crisis Eyler who runs the Center for Excellence in Teaching and Learning at the University of Mississippi illustrates how grades interfere with students intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery Grades force students to focus on rewards and distract them from exploring ideas or pursuing interests beyond what they ll be tested on In fact grades significantly impede the learning process They are also significantly affecting children s physical emotional and psychological well being Rates of anxiety depression and suicidal ideation have spiked and academic stress tied to grades is a leading cause of this escalation Eyler shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions Equal parts scathing and hopeful *Failing Our Future* aims to improve the lives of students by encouraging them to define success on their own terms Parents educators policymakers and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms

Miller-Davenport,2021-07-06 How Hawai i became an emblem of multiculturalism during its journey to statehood in the mid twentieth century Gateway State explores the development of Hawai i as a model for liberal multiculturalism and a tool of American global power in the era of decolonization The establishment of Hawai i statehood in 1959 was a watershed moment not only in the ways Americans defined their nation s role on the international stage but also in the ways they understood the problems of social difference at home Hawai i s remarkable transition from territory to state heralded the emergence of postwar multiculturalism which was a response both to independence movements abroad and to the limits of civil rights in the United States Once a racially problematic overseas colony by the 1960s Hawai i had come to symbolize John F Kennedy s New Frontier This was a more inclusive idea of who counted as American at home and what areas of the world were considered to be within the U S sphere of influence Statehood advocates argued that Hawai i and its majority Asian population could serve as a bridge to Cold War Asia and as a global showcase of American democracy and racial harmony In the aftermath of statehood business leaders and policymakers worked to institutionalize and sell this ideal by capitalizing on Hawai i s diversity Asian Americans in Hawai i never lost a perceived connection to Asia Instead their ethnic difference became a marketable resource to help other Americans navigate a decolonizing world As excitement over statehood dimmed the utopian vision of Hawai i fell apart revealing how racial inequality and U S imperialism continued to shape the fiftieth state and igniting a backlash against the islands white dominated institutions **The Schenley Experiment** Jake

Oresick,2017-04-14 The Schenley Experiment is the story of Pittsburgh s first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both

the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

*The One Percent Solution* Gordon Lafer,2017-04-04 In the aftermath of the 2010 Citizens United decision it s become commonplace to note the growing political dominance of a small segment of the economic elite But what exactly are those members of the elite doing with their newfound influence The One Percent Solution provides an answer to this question for the first time Gordon Lafer s book is a comprehensive account of legislation promoted by the nation s biggest corporate lobbies across all fifty state legislatures and encompassing a wide range of labor and economic policies In an era of growing economic insecurity it turns out that one of the main reasons life is becoming harder for American workers is a relentless and concerted offensive by the country s best funded and most powerful political forces corporate lobbies empowered by the Supreme Court to influence legislative outcomes with an endless supply of cash These actors have successfully championed hundreds of new laws that lower wages eliminate paid sick leave undo the right to sue over job discrimination and cut essential public services Lafer shows how corporate strategies have been shaped by twenty first century conditions including globalization economic decline and the populism reflected in both the Trump and Sanders campaigns of 2016 Perhaps most important Lafer shows that the corporate legislative agenda has come to endanger the scope of democracy itself For anyone who wants to know what to expect from corporate backed Republican leadership in Washington D C there is no better guide than this record of what the same set of actors has been doing in the state legislatures under its control
