Global Studies Africa Vol Six Se 1997c. ,1950 Using a highly personalized narrative writing style hands on activities and primary source materials this program is designed to help students learn about the geography history cultures economies and politics of the major world regions Reading Level 6 7 Interest Level 7 10 **Celebrity Colonialism** Robert Clarke, 2020-06-12 *Celebrity Colonialism* brings together studies on an array of personalities movements and events from the colonial era to the present and explores the intersection of discourses formations and institutions that condition celebrity in colonial and postcolonial cultures Across nineteen chapters it examines the entanglements of fame and power fame in colonial and postcolonial settings Each chapter demonstrates the sometimes highly ambivalent roles played by famous personalities as endorsements and apologists for antagonists and challengers of colonial imperial and postcolonial institutions and practices And each in their way provides an insight into the complex set of meanings implied by novel term celebrity colonialism The contributions to this collection demonstrate that celebrity provides a powerful lens for examining the nexus of discourses institutions and practices associated with the dynamics of appropriation domination resistance and reconciliation that characterize colonial and postcolonial cultural politics Taken together the contributions to *Celebrity Colonialism* argue that the examination of celebrity promises to enrich our understanding of what colonialism was and more

significantly what it has become The Continuing Imperialism of Free Trade Jo Grady, Chris Grocott, 2018-10-08 In 1953 John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay *The Imperialism of Free Trade*. They reshaped how historians saw the British empire focussing not on the red bits on the map and the wishes of policy makers in London but rather on British economic and political influence globally. Expanding on this analysis this volume provides an examination of imperialism which brings the reader right up to the present. This book offers an innovative assessment and analysis of the history and contemporary status of imperial control. It does so in four parts examining the historical emergence and traditions of imperialism the relationships between the periphery and the metropolitan the role of supranational agencies in the extension of imperial control and how these connect to financialisation and international political economy. The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors both established and up and coming scholars activists and those from industry from a wide range of disciplines and backgrounds. In providing these authors a space to apply their insights this engaging volume sheds light on the practical implications of imperialism for the contemporary world. With a broad chronological and geographical sweep this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies. It will be of great interest to a broad range of disciplines across the humanities and social sciences especially those working in History Politics and Management and Organisation Studies **China, Trust and Digital Supply Chains** Warwick

Powell, 2022-09-01 *China Trust and Digital Supply Chains* presents a critical reflection on blockchain technologies in the context of their adoption in China and the world that China is engaged in and shaping. Approaching the issues of blockchain technology adoption and development on China's own terms is critical if policy makers and others are to make effective sense of one of the key dynamics shaping the next few decades of the global landscape. The work challenges the trust trope that dominates much discussion of blockchain technology's application. It argues contrary to the predominant trust trope that blockchain is not about trust at all. It shows that China's reimagining of the 21st century global order is premised on driving intensified cross border economic interactions without the presupposition of trust and blockchain technology makes that possible. It also explores the paradox of technological decentralisation being taken up with vigour by a centralist polity the role of blockchain technology as a critical condition of existence for the successful globalisation of China's digital currency initiative and the need to devise governance institutions that are multilateral in nature to reflect the multi polar nature of decentralised information systems with domestic and cross border permutations. This book is of significant interest to readers of political economy public policy blockchain technology and Chinese studies *Resources in Education* , 2001-04
