reduced balance postural control and reduced mobility and proprioception. These physical symptoms lead to reduced social participation and poor quality of life. Over the past ten years there has been an enormous focus on the use of virtual reality VR and other technologies to improve clinical outcomes for people with stroke. These technologies include large scale bespoke manufactured immersive virtual reality system or home based rehabilitation device such as the commercially available device Nintendo Wii and Microsoft Xbox. The clinical efficacy of these rehabilitation technologies has been studied extensively but our understanding of the underlying mechanism of recovery induced by these technologies is poor. There are two aspects of recovery that must be considered. One is the learning compensation strategies where patients acquired new skills to improve functional abilities. The other aspect is the neuroplasticity mechanism which leads to cortical map reorganisation. The patient is able to re-use the same body segments in the same way as they did before the stroke. Published studies generally reported improvement in upper limb function lower limb function balance and gait. This leads to the uncertainty whether these technologies are effective in promoting recovery at neural level or functional level. With the advance in technology monitoring techniques such as neural imaging motion analysis and EMGs devices have broad applications in the understanding of neural recovery post stroke. Studies that utilize functional outcome measures or observational design may be more effective in identifying functional recovery. A combination of the two designs may be helpful to provide new insights on the recovery mechanism induced by rehabilitation devices.

The United States Catalog, 1906 *Coleção Nintendo All-Stars: Donkey Kong* Editora Europa, 2024-08-26. Se certo dizer que sem galinha não existia ovo também podemos dizer que sem gorila não existia encanador. O personagem mais famoso da Nintendo Mario não tinha nem nome quando apareceu pela primeira vez em um videogame. Ele era chamado apenas de Jumpman e o game em questão era Donkey Kong, um dos maiores sucessos da história dos arcades. Com o passar do tempo Donkey passou de vilão a herói e estreou um grande número de jogos de diversos estilos entrando de vez para o time dos grandes personagens de videogame. Por isso o macaco não está sozinho neste volume de Nintendo All Stars pois outras duas

franquias famosas da Big N também são homenageadas aqui F Zero foi meio que colocada de lado pela Nintendo nos últimos anos o lançamento mais recente de 2004 mas com tantos jogos bons e revolucionários principalmente o primeiro de Super NES o gênero de corrida futurista não seria o mesmo sem a presença de Captain Falcon e seus rivais E para fechar com um direto no queixo da saudade vamos lembrar a trajetória de Little Mac o lutador protagonista de Punch Out série de boxe que nasceu nos arcades e passou por vários sistemas domésticos trazendo consigo até o ex-campeão dos pesos pesados Mike Tyson
