A dual approach

ROBERT G. CHAMBERS

The bottom half of the cover features a complex, abstract geometric pattern. It consists of numerous overlapping triangles of varying sizes and orientations, creating a sense of depth and movement. The colors are dark, with shades of brown, black, and grey, contrasting with the bright red upper section.

[Environmental Research at the Leading Edge](#) Alfred B. Gore, 2007 The environment is considered the surroundings in which an organism operates including air water land natural resources flora fauna humans and their interrelation It is this environment which is both so valuable on the one hand and so endangered on the other And it is people who are by and large ruining the environment both for

themselves and for all other organisms This book reviews the latest research in this field which is vital for everyone

Pricing non-marketed goods using distance functions Fare Rolf, Grosskopf Shawna, Margaritis Dimitris, 2019-06-17
Written by production economics and finance specialists Rolf Fare and Shawna Grosskopf of Oregon State University and Dimitris Margaritis of the University of Auckland *Pricing Non marketed Goods Using Distance Functions* is an inspiring new contribution highlighting the importance of duality theory for valuation purposes especially for hard to price inputs or resources intended or unintended goods and assets The theoretical pricing models are supplemented by self standing empirical applications covering real estate pricing environmental preservation transfer pricing shadow prices of university knowledge outputs and spillovers and the pricing of bank equity capital and non performing loans *A Production Function-based Policy Stimulation Model of Perennial Commodity Markets* Takamasa Akiyama, Jonathan R. Coleman, Banco Mundial, 1993 Multi-Output Production and Duality: Theory and Applications Rolf Färe, Daniel Primont, 2012-12-06 Our original reason for writing this book was the desire to write down in one place a complete summary of the major results in duality theory pioneered by Ronald W Shephard in three of his books *Cost and Production Functions* 1953 *Theory of Cost and Production Functions* 1970 and *Indirect Production Functions* 1974 In this way newcomers to the field would have easy access to these important ideas In addition we report a few new results of our own In particular we show the duality relationship between the profit function and the eight equivalent representations of technology that were elucidated by Shephard However in planning the book and discussing it with colleagues it became evident that such a book would be more useful if it also provided a number of applications of Shephard's duality theory to economic problems Thus we have also attempted to present examples of the use of duality theory in areas such as efficiency measurement index number theory shadow pricing cost benefit analysis and econometric estimation Much of our thinking about duality theory and its uses has been influenced by our present and former collaborators They include Charles Blackorby Shawna Grosskopf Knox Lovell Robert Russell and not surprisingly Ronald W Shephard We have also benefited over the years from many discussions with W Erwin Diewert **Agrobiodiversity Conservation and Economic Development** Andreas Kontoleon, Unai Pascual, Melinda Smale, 2008-10-03 This book reflects current developments in the economics of agrobiodiversity and focuses its attention on the role agrobiodiversity can have for economic development As a new and rapidly expanding subfield at the interface of environmental ecological agricultural and development economics the editors and contributors to this volume provide a thorough structured and authoritative coverage of this field Topics covered include the economic modelling of agrobiodiversity policy and governance solutions for the conservation of biodiversity in agricultural landscapes contracts markets and valuation The authors include well known and respected academics and researchers who have a real policy perspective into the role of agrobiodiversity and economic development The book provides coherent and up to date coverage of the economics of in situ agrobiodiversity conservation which is to a large extent currently absent Though the material in

the volume is primarily written for economists its content and style are highly relevant and accessible to ecologists and conservation biologists and to academics from other broad disciplines that are located within the areas of economics and ecology

Duality and Modern Economics Richard Cornes,1992-02-28 Provides a simple introductory exposition to the basic structure of dual technique analysis consumer behaviour and producer behaviour which has been used by many economists since the 1970s Includes diagrams and an index

International Research on Natural Resource Management Hermann Waibel,David Zilberman,2007-01-01 Over the past two decades significant investment has been made into agriculture related natural resource management research in developing countries This collection of case studies establishes a methodological foundation for impact assessments of NRMR through a discussion of research conducted by the CGIAR around the world

Production Economics Svend Rasmussen,2012-08-04 This book covers the basic theory of how what and when firms should produce to maximise profits Based on the neoclassical theory of the firm presented in most general microeconomic textbooks it extends the general treatment and focuses on the application of the theory to specific problems that the firm faces when making production decisions to maximise profits Increasing level of government regulation and the use of specialised and often very expensive equipment in modern production motivates the following focus areas 1 How to optimise production under restrictions 2 Treatment of fixed inputs and the process of input fixation 3 Optimisation of production over time 4 Linear and Mixed Integer Programming as tools for optimisation in practice This updated second edition includes a more comprehensive introduction to the theory of decision making under risk and uncertainty as well as a new chapter on how to use linear programming to generate the supply function of the firm

Science for Agriculture Wallace E. Huffman,Robert E. Evenson,2008-02-28 Science for Agriculture was the first thorough quantitative and analytical treatment of the history of the U S agricultural research system and as such has served as the foundation for research over the 10 years since its publication The benefits from public and private investment in agricultural research are immense and should be understood by every student of the agricultural science system in the United States The second edition updates important landmarks components characteristics and trends of the U S system for developing and applying science to increase the productivity and advancements of agriculture Science for Agriculture 2e is essential reading for agriculture educators and researchers Land Grant administrators food and agri industry R D and all others who need to understand the factors that will influence future public agricultural research policy

Forests in a Market Economy Erin O. Sills,Karen Lee Abt,2013-04-17 This book draws together contributions from forest economists in the Research Triangle of North Carolina with co authors from institutions around the world It represents our common belief that rigorous empirical analysis in an economic framework can inform forest policy We intend the book as a guide to the empirical methods that we have found most useful for addressing both traditional and modern areas of concern in forest policy including timber production and markets multiple use forestry

and valuation of non market benefits The book editors and most chapter authors are affiliated with three institutions in the Research Triangle the Southern Research Station of the USDA Forest Service K Abt Butry Holmes Mercer Moulton Prestemon Wear the Department of Forestry at North Carolina State University R Abt Ahn Cabbage Sills and the Environmental and Natural Resource Economics Program of Research Triangle Institute Murray Pattanayak Two other Triangle institutions are also represented among the book authors Duke University Kramer and the Forestland Group Zinkhan In addition to our primary affiliations many of us are adjunct faculty and or graduates of Triangle universities Many of our co authors also graduated from or were previously affiliated with Triangle institutions Thus the selection of topics methods and case studies reflects the work of this particular network of economists and to some degree our location in the southeastern United States However our work and the chapters encompass other regions of the United States and the world including Latin America and Asia
