Mathematical Tables and Other Aids to Computation ,1953 *Integer Programming and Related Areas* Rabe v. Randow,2012-12-06

The fields of integer programming and combinatorial optimization continue to be areas of great vitality with an ever increasing number of publications and journals appearing A classified bibliography thus continues to be necessary and useful today even more so than it did when the project of which this is the fifth volume was started in 1970 in the Institut fur Okonometrie und Operations Research of the University of Bonn The pioneering first volume was compiled by Claus Kastning during the years 1970 1975 and appeared in 1976 as Volume 128 of the series Lecture Notes in Economics and Mathematical Systems published by the Springer Verlag Work on the project was continued by Dirk Hausmann Reinhardt Euler and Rabe von Randow and resulted in the publication of the second third and fourth volumes in 1978 1982 and 1985 Volumes 160 197 and 243 of the above series The present book constitutes the fifth volume of the bibliography and covers the period from autumn 1984 to the end of 1987 It contains 5864 new publications by 4480 authors and was compiled by Rabe von Randow Its form is practically identical to that of the first four volumes some additions having been made to the subject list

Miscellaneous Publication ,1974 **Journal of Statistical Planning and Inference** North-Holland Publishing Company,2003 **Public Governance and Emerging Technologies** Jurgen Goossens,Esther Keymolen,Antonia Stanojević,2025-03-26

This open access book focuses on public governance s increasing reliance on emerging digital technologies Disruptive or emerging digital technologies such as artificial intelligence and blockchain are often portrayed as highly promising with the potential to transform established societal economic or governmental practices Unsurprisingly public actors are therefore increasingly experimenting with the application of these emerging digital

technologies in public governance The first part of the book shows how automatization via algorithmic systems the networked nature of distributed technologies such as blockchain and data driven use of AI in public governance can promote hyper connectivity and hyper complexity This trend and the associated concerns have drawn societal political and scholarly attention to regulatory compliance considering the current and potential future uses of emerging technologies Accordingly the second part of the book focuses on regulatory compliance and regulatory solutions It explores the compatibility of technology with existing regulations existing legal tools that could be innovatively applied for the successful regulation of emerging technologies and approaches to updating existing legislation or creating new legislation for the regulation of emerging technologies While socio ethical considerations on upholding public values in a digital world are at the heart of all chapters the third part specifically focuses on public values and trust It advances a conceptual normative discussion putting the spotlight on trust and other fundamental public values that should be safeguarded The book shows that the success of using emerging technologies in public governance depends to a large extent on the choices made by key stakeholders in public administration legislative and regulatory bodies and tech companies When using and regulating emerging technologies in public governance it is crucial to uphold public values and comply with legislation in a way that prioritizes the citizen s perspective To this end the book offers an interdisciplinary approach based on qualitative and conceptual research

Naval Research Logistics Quarterly, 1958 *The Landscape in Black and White* Oliver Schuchard, 2005 In this magnificent book Oliver Schuchard provides more than sixty five exquisite black and white photographs spanning his thirty eight years of photography In addition he explains the aesthetic rationale and techniques he used in order to produce these photographs emphasizing the profound differences between yet necessary interdependence of craft and content Although Schuchard believes that craft is important he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are in fact functions of one another The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher He chose the splendid photographs included in this book from among nearly 5 000 negatives that had been exposed all over the world from Missouri to Maine California Alaska Colorado France Newfoundland and Hawaii among many other locations Approximately 250 negatives survived the initial review and each of those was printed before a final decision was made on which photographs were to be featured in the book The final choices are representative of Schuchard s work and serve to substantiate his belief that craft concept and self must be fully understood and carefully melded for a good photograph to occur This amazing work by award winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike as well as by anyone who simply enjoys superb photography
