A Million Years Of Music The Emergence Of Human Modernity:

A Million Years of Music Gary Tomlinson, 2015-04-17 What is the origin of music In the last few decades this centuries old puzzle has been reinvigorated by new archaeological evidence and developments in the fields of cognitive science linguistics and evolutionary theory In this path breaking book renowned musicologist Gary Tomlinson draws from these areas to construct a new narrative for the emergence of human music Starting at a period of human pre_history long before Homo sapiens or music existed Tomlinson describes the incremental attainments that by changing the communication and society of prehuman species laid the foundation for musical behaviors in more recent times He traces in Neanderthals and early sapiens the accumulation and development of these capacities and he details their coalescence into modern musical behavior across the last hundred millennia But *A Million Years of Music* is not about music alone Tomlinson builds a model of human evolution that revises our understanding of the interaction of biology and culture across evolutionary time scales challenging and enriching current models of our deep history As he tells his story he draws in other emerging human traits language symbolism a metaphysical imagination and the ritual it gives rise to complex social structure and the use of advanced technologies Tomlinson s model of evolution allows him to account for much of what makes us a unique species in the world today and provides a new way of understanding the appearance of humanity in its modern form

A Million Years of Music Gary Tomlinson, 2015-02-27 What is the origin of music In the last few decades this centuries old puzzle has been reinvigorated by new archaeological evidence and developments in the fields of cognitive science linguistics and evolutionary theory Starting at a period of human prehistory long before Homo sapiens or music existed Tomlinson describes the incremental attainments that by changing the communication and society of prehuman species laid the foundation for musical behaviors in more recent times He traces in Neanderthals and early sapiens the accumulation and development of these capacities and he details their coalescence into modern musical behavior across the last hundred millennia

Construction Site for Possible Worlds Amanda Beech, Robin Mackay, James Wiltgen, 2020-08-11 Perspectives from philosophy aesthetics and art on how to envisage the construction site of possible worlds Given the highly coercive and heavily surveilled dynamics of the present moment when the tremendous pressures exerted by capital on contemporary life produces an aggressively normative official reality the question of the construction of other possible worlds is crucial and perhaps more urgent than ever This collection brings together different perspectives from the fields of philosophy aesthetics and art to discuss the mechanisms through which possible worlds are thought constructed and instantiated forcefully seeking to overcome the contemporary moment s deficit of conceptualizing alternate realities its apparent fear of imagining possible new and compelling futures to begin the arduous task of producing the political dynamics necessary for actual construction Implicit in this dynamic between the imaginary and the possible is the question of how thinking intertwines with both rationality and the inherited contingencies and structures of the world With no ascertainable ground on which to build with

no confidence in any given that could guarantee our labors how do we even envisage the construction site s of possible worlds and with what kind of diagrams tools and languages can we bring them into being Just in Time G. Gabrielle Starr,2023-06-06 Literature and neuroscience come together to illuminate the human experience of beauty which unfolds in time How does beauty exist in time This is Gabrielle Starr s central concern in *Just in Time* as she explores the experience of beauty not as an abstraction but as the result of psychological and neurological processes in which time is central Starr shows that aesthetic experience has temporal scale Starr a literary scholar and pioneer in the field and method of neuroaesthetics which seeks the neurological basis of aesthetic experience applies this methodology to the study of beauty in literature considering such authors as Rita Dove Gerard Manley Hopkins Henry James Toni Morrison and Wallace Stevens as well as the artists Dawoud Bey and Jasper Johns *Just in Time* is richly informed by the methods and findings of neuroscientists whose instruments let them investigate encounters with art down to the millisecond but Starr goes beyond the laboratory to explore engagements with art that unfold over durations experiments cannot accommodate In neuroaesthetics Starr shows us the techniques of the empirical sciences and humanistic interpretation support and complement one another To understand the temporal quality of aesthetic experience we need both cognitive and phenomenological approaches and this book moves boldly toward their synthesis Technology and the Diva Karen Henson,2016-09-12 Focuses on the operatic soprano as the diva and her relationships with technology from the 1820s to the digital age *Modular Synthesis* Ezra J. Teboul,Andreas Kitzmann,Einar Engström,2024-04-24 *Modular Synthesis Patching Machines and People* brings together scholars artists composers and musical instrument designers in an exploration of modular synthesis an unusually multifaceted musical instrument that opens up many avenues for exploration and insight particularly with respect to technological use practice and resistance Through historical technical social aesthetic and other perspectives this volume offers a collective reflection on the powerful connections between technology creativity culture and personal agency Ultimately this collection is about creativity in a technoscientific world and speaks to issues fundamental to our everyday lives and experiences by providing insights into the complex relationships between content creators the technologies they use and the individuals and communities who design and engage with them With chapters covering VCV Rack modular synthesis instrument design and the histories of synthesizer technology as well as interviews with Dave Rossum Corry Banks Meng Qi and Dani Dobkin among others *Modular Synthesis* is recommended reading for advanced undergraduates researchers and practitioners of electronic music and music technology Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license The Voice as Something More Martha Feldman,Judith T. Zeitlin,2019-09-30 In the contemporary world voices are caught up in fundamentally different realms of discourse practice and culture between sounding and nonsounding material and nonmaterial literal and metaphorical In *The Voice as*

Something More Martha Feldman and Judith T Zeitlin tackle these paradoxes with a bold and rigorous collection of essays that look at voice as both object of desire and material object Using Mladen Dolar's influential *A Voice and Nothing More* as a reference point *The Voice as Something More* reorients Dolar's psychoanalytic analysis around the material dimensions of voices their physicality and timbre the fleshiness of their mechanisms the veils that hide them and the devices that enhance and distort them Throughout the essays put the body back in voice Ending with a new essay by Dolar that offers reflections on these vocal aesthetics and paradoxes this authoritative multidisciplinary collection ranging from Europe and the Americas to East Asia from classics and music to film and literature will serve as an essential entry point for scholars and students who are thinking toward materiality

Playing to the Crowd Nancy K. Baym, 2018-07-10 *Playing to the Crowd* explores and explains how the rise of digital communication platforms has transformed artist fan relationships into something more intimate Through in depth interviews with musicians such as the Cure UB40 and Throwing Muses Nancy K Baym reveals how new media has facilitated connections through the active participation of both the artists and their devoted digital fan base Before the rise of online sharing and user generated content audiences were mostly seen as undifferentiated masses often mediated through record labels and the press Today musicians and fans have built more active relationships through social media fan sites and artist sites giving them a new sense of intimacy while offering artists unparalleled access to and information about their audiences But this comes at a price For audiences meeting their heroes can kill the mystique And for artists maintaining active relationships with so many people can be labor intensive and emotionally draining Drawing on her own rich history as a deeply connected music fan Baym offers an entirely new approach to media culture arguing that the work musicians put into maintaining these intimate relationships reflects the demands of the gig economy one which requires resources and strategies that we all music come to recognize Publisher's description

Sonic Intimacy Dominic Pettman, 2017-03-21 A perceptive engaging and clever set of meditations on how sound produces human technical and nonhuman intimacies Richard Grusin University of Wisconsin Milwaukee *Sonic Intimacy* asks us who or what deserves to have a voice beyond the human Arguing that our ears are far too narrowly attuned to our own species the book explores four different types of voices the cybernetic the gendered the creaturely and the ecological Through both a conceptual framework and a series of case studies Dominic Pettman tracks some of the ways in which these voices intersect and interact He demonstrates how intimacy is forged through the ear perhaps even more than through any other sense mode or medium The voice then is what creates intimacy both fleeting and lasting not only between people but also between animals machines and even natural elements those presumed not to have a voice in the first place Taken together the manifold material actual voices of the world whether primarily natural or technological are a complex cacophony that is desperately trying to tell us something about the rapidly failing health of the planet and its inhabitants As Pettman cautions we would do well to listen Pettman is a very engaging writer and the way he traverses contexts and theoretical horizons is thrilling Naomi Waltham

Smith Boundary 2 With Sonic Intimacy we are manifestly in the hands of a skilled and not a little playful writer who connects new media to long developed philosophical conversations David Cecchetto York University

England's Folk Revival and the Problem of Identity in Traditional Music Joseph Williams, 2022-08-12 Establishing an intersection between the fields of traditional music studies English folk music history and the philosophy of Gilles Deleuze and Félix Guattari this book responds to the problematic emphasis on cultural identity in the way traditional music is understood and valued Williams locates the roots of contemporary definitions of traditional music including UNESCO designated intangible cultural heritage in the theory of English folk music developed in 1907 by Cecil Sharp Through a combination of Deleuzian philosophical analysis and historical revision of England's folk revival of the Victorian and Edwardian eras Williams makes a compelling argument that identity is a restrictive ideology that runs counter to the material processes of traditional music's production Williams reimagines Sharp's appropriation of Darwinian evolutionary concepts asking what it would mean today to say that traditional music evolves in light of recent advances in evolutionary theory The book ultimately advances a concept of traditional music

that eschews the term's long standing ontological and axiological foundations in the principle of identity For scholars and graduate students in musicology cultural studies and ethnomusicology the book is an ambitious and provocative challenge to entrenched habits of thought in the study of traditional music and the historiography of England's folk revival *Open Access Musicology* Louis Epstein, 2020-10-30 In the fall of 2015 a collection of faculty at liberal arts colleges began a conversation about the challenges we faced as instructors Why were there so few course materials accessible to undergraduates and lay readers that reflected current scholarly debate How can we convey the relevance of studying music history to current and future generations of students And how might we represent and reflect the myriad often conflicting perspectives positions and identities that make up both music's history and the writers of history Here we offer one response to those questions *Open Access Musicology* is a collection of essays written in an accessible style and with a focus on modes of inquiry rather than content coverage Our authors draw from their experience as scholars but also as teachers They have been asked to describe why they became musicologists in the first place and how their individual paths led to the topics they explore and the questions they pose Like most scholarly literature the essays have all been reviewed by experts in the field Unlike all scholarly literature the essays have also been reviewed by students at a variety of institutions for clarity and relevance These essays are intended for undergraduates graduate students and interested readers without any particular expertise They can be incorporated into courses on a range of topics as standalone readings or used to supplement textbooks The topics introduce and explore a variety of subjects practices and methods but above all seek to stimulate classroom discussion on music history's relevance to performers listeners and citizens *Rethinking Music through Science and Technology Studies* Antoine Hennion, Christophe Levaux, 2021-05-03 This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies STS which propose that facts are neither absolute truths nor completely relative but emerge from an intensely collective process of construction Applied to the study of music this approach enables us to reconcile the human social factual and technological aspects of the musical world and opens the prospect of new areas of inquiry in musicology and sound studies *Rethinking Music through Science and Technology Studies* draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies considering topics ranging from classical music instrument making to the ethos of DIY in punk music The book's four sections focus on key areas of music study that are impacted by STS organology sound studies music history and epistemology Raising crucial methodological and epistemological questions about the study of music this book will be relevant to scholars studying the interactions between music culture and technology from many disciplinary perspectives **A History of Emotion in Western Music** Michael Spitzer, 2020 This landmark book not only offers the first account of the history of emotion in Western music with a broad sweep from Gregorian chant to Beyoncé but also lays out an original theory for understanding musical emotion that centers the work of composers and performers **The Oxford**

Handbook of Cognitive Archaeology Thomas Wynn, Karenleigh Overmann, Frederick Coolidge, 2024-03-27 The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies changes operations neuroarchaeology ethnographic comparison and the direct historical approach

Music in the Flesh Bettina Varwig, 2023-07-20 A corporeal history of music making in early modern Europe Music in the Flesh reimagines the lived experiences of music making subjects composers performers listeners in the long seventeenth century There are countless historical testimonies of the powerful effects of music upon the early modern body it is described as moving ravishing painful dangerous curative and miraculous while affecting the circulation of the humors the purification of the blood the dilation of the vessels and pores How were these early modern European bodies constituted that music generated such potent bodily spiritual effects Bettina Varwig argues that early modern music making practices challenge our modern understanding of human nature as a mind body dichotomy Instead they persistently affirm a more integrated anthropology in which body soul and spirit remain inextricably entangled Moving with ease across repertoires and regions sacred and vernacular musics and domestic and public settings Varwig sketches a musical physiology that is as historically illuminating as it is relevant for present day performance This book makes a significant contribution not just to the history of music but also to the history of the body the senses and the emotions revealing music as a unique access point for reimagining early modern modes of being in the world
