A Philosophy Of Education Volume 6:

The Middle Works of John Dewey, Volume 6 John Dewey, 2008 Volume 11 brings together all of Dewey's writings for 1918 and 1919. A Modern Language Association Committee on Scholarly Editions textual edition. Dewey's dominant theme in these pages is war and its aftermath. In the Introduction Oscar and Lilian Handlin discuss his philosophy within the historical context. The First World War slowly ground to its costly conclusion and the immensely more difficult task of making peace got painfully under way. The armistice that some expected would permit a return to normalcy opened instead upon a period of turbulence that agitated further a society already unsettled by preparations for battle and by debilitating conflict overseas. After spending the first half of 1918-19 on sabbatical from Columbia at the University of California, Dewey traveled to Japan and China where he lectured, toured, and assessed. In his essays the relationship between the two nations. From Peking he reported the student revolt known as the May Fourth Movement. The forty items in this volume also include an analysis of Thomas Hobbes's philosophy, an affectionate commemorative tribute to Theodore Roosevelt, our Teddy, the syllabus for Dewey's lectures at the Imperial University in Tokyo which were later revised and published as *Reconstruction in Philosophy*, an exchange with former disciple Randolph Bourne about Friedrich Schopenhauer's *Man's Supreme Inheritance*, and central to Dewey's creed *Philosophy and Democracy*. His involvement in a study of the Polish American community in Philadelphia resulting in an article, two memoranda, and a lengthy report is discussed in detail in the Introduction and in the Note on the Confidential Report of Conditions among the Poles in the United States.

Knowledge and the Curriculum (International Library of the Philosophy of Education Volume 12) Paul H. Hirst, 2010-02-25 The papers in this volume provide a coherent philosophical study of a group of important and pressing educational issues such as the selection of objectives for less able children, the fundamental characteristics of teaching, and the integration of the curriculum. A thesis on the necessary differentiation of knowledge into logically distinct forms is outlined and is defended against recent philosophical criticisms. Its implications for curriculum planning are examined with particular reference to the urgent problems of adequately characterizing liberal education and those forms of moral and religious education that are appropriate in maintained schools.

Philosophy of Education (International Library of the Philosophy of Education Volume 14) Terence W. Moore, 2010-02-25 This volume provides an introduction to the philosophy of education which will enable students meeting the subject for the first time to find their way among the many specialized volumes. It deals in a non-technical way with the more important issues raised in a philosophical approach to education and gives a clear idea of the scope of the subject. After discussing different theories of the aims of education, whether mechanistic or organic, the author addresses practical issues, for example, about the curriculum, the distinction between education and indoctrination, the role of authority and discipline, and the place of religious and moral teaching. Finally, he deals with some important aspects of education and the influence of different political structures on the philosophy of education.

Ethics and Educational Policy (International Library of

the Philosophy of Education Volume 21) Kenneth A. Strike, Kieran Egan, 2010-02-25 This is a philosophical treatment of the conceptual and normative aspects of topics which are currently a matter of policy debate in education. The authors have focussed on such concepts as liberty, autonomy, equality and pluralism and have provided a philosophical commentary which relates these concepts both to a background of philosophical literature and to the institutional contexts and policy debates in which they function. The book will be of significance to all policy makers who need to gain an understanding of the values and concepts involved in major policy problems. Treatise on Basic Philosophy: Volume 6 M. Bunge, 2013-12-01 **New**

Essays in the Philosophy of Education (International Library of the Philosophy of Education Volume 13) Glenn Langford, D.J. O'Connor, 2010-02-25 The contributors to this collection of essays offer a stimulating and varied range of approaches to this developing area. The volume includes discussions on the concept of education and such related topics as indoctrination and the nature and scope of the theory of education. Aspects of education including the field of moral education and issues which are reflected prominently in the curricula of such subjects as Mathematics and Science in schools and colleges are considered. **The Later Works of John Dewey, Volume 6, 1925 - 1953** John Dewey, 2008-04 Except for Dewey's and James H. Tufts' 1932 *Ethics*, Volume 7 of *The Later Works*, this volume brings together Dewey's writings for 1931, 1932, The Great Depression, presented John Dewey and the American people with a series of economic, political and social crises in 1931 and 1932 that are reflected in most of the 86 items in this volume even in philosophical essays such as *Human Nature*. As Sidney Ratner points out in his Introduction, Dewey's interest in international peace is featured in the writings in this volume. *The Concept of Education (International Library of the Philosophy of Education Volume 17)* R.S. Peters, 2010-02-25 A series of public lectures given at the Institute of Education, University of London, provides the nucleus around which this collection, originally published in 1967, is gathered. This collection provides comprehensive coverage of a complex theme which will be of interest to those involved in the fields of philosophy and education alike. Topics covered include the logical and psychological aspects of learning, the concept of play, rule and routines, teaching and training, philosophical models of teaching. *Towards a Philosophy of Education* Charlotte Mason, 2010-08-01 *Towards a Philosophy of Education* is the sixth volume of Charlotte Mason's six-part homeschooling series, a series that is considered one of the finest ever written on education. *Towards a Philosophy of Education* gives the best overview of Mason's teaching philosophy. Written years after she was able to see her teaching methods in action, she is able to give further examples and directions. Mason's method of education shows its strength through its widespread use today by private schools and homeschooling families. It is flexible and includes first-hand exposure to ideas through books in art, music and poetry, nature observation as the primary means of early science teaching, use of manipulatives and real-life application to understand mathematical concepts and learning to reason rather than rote memorization and an emphasis on character and on cultivating and maintaining good personal habits. The complete collection of Charlotte Mason's Original Homeschooling Series includes

Volume 1 Home Education Volume 2 Parents and Children Volume 3 School Education Volume 4 Ourselves Volume 5 Formation Of Character Volume 6 Towards A Philosophy of Education *Routledge Library Editions: Philosophy of Education* Various Authors,2022-07-30 This set of 21 volumes originally published between 1955 and 1997 amalgamates several topics on the philosophy of education with a particular focus on religious education curriculum studies and critical thinking This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject and will be of particular interest to students of philosophy education and those undertaking teaching qualifications
