Partial Least Squares Structural Equation Modeling (PLS-SEM) Using R Joseph F. Hair Jr.,G. Tomas M. Hult,Christian M. Ringle,Marko Sarstedt,Nicholas P. Danks,Soumya Ray,2021-11-03 Partial least squares structural equation modeling PLS SEM has become a standard approach for analyzing complex inter relationships between observed and latent variables Researchers appreciate the many advantages of PLS SEM such as the possibility to estimate very complex models and the method s flexibility in terms of data requirements and measurement specification This practical open access guide provides a step by step treatment of the major choices in analyzing PLS path models using R a free software environment for statistical computing which runs on Windows macOS and UNIX computer platforms Adopting the R software s SEMinR package which brings a friendly syntax to creating and estimating structural equation models each chapter offers a concise overview of relevant topics and metrics followed by an in depth description of a case study Simple instructions give readers the how tos of using SEMinR to obtain solutions and document their results Rules of thumb in every chapter provide guidance on best practices in the application and interpretation of PLS SEM

Partial Least Squares Structural Equation Modeling Necmi K. Avkiran,Christian M. Ringle,2018-02-16 This book pulls together robust practices in Partial Least Squares Structural Equation Modeling PLS SEM from other disciplines and shows how they can be used in the area of Banking and Finance In terms of empirical analysis techniques Banking and Finance is a conservative discipline As such this book will raise awareness of the potential of PLS SEM for application in various contexts PLS SEM is a non parametric approach designed to maximize explained variance in latent constructs Latent constructs are directly unobservable phenomena such as customer service quality and managerial competence Explained variance refers to the extent we can predict say customer service quality by examining other theoretically related latent constructs such as conduct of staff and communication skills Examples of latent constructs at the microeconomic level include customer service quality managerial effectiveness perception of market leadership etc macroeconomic level latent constructs would be found in contagion of systemic risk from one financial sector to another herd behavior among fund managers risk tolerance in financial markets etc Behavioral Finance is bound to provide a wealth of opportunities for applying PLS SEM The book is designed to expose robust processes in application of PLS SEM including use of various software packages and codes including R PLS SEM is already a popular tool in marketing and management information systems used to explain latent constructs Until now PLS SEM has not enjoyed a wide acceptance in Banking and Finance Based on recent research developments this book represents the first collection of PLS SEM applications in Banking and Finance This book will serve

as a reference book for those researchers keen on adopting PLS SEM to explain latent constructs in Banking and Finance
