A Prehistory Of The North Human Settlement Of The Higher Latitudes:

A Prehistory of the North John F. Hoffecker, 2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the coldest places on earth

Macroevolution in Human Prehistory Anna Prentiss, Ian Kuijt, James C. Chatters, 2009-09-18 Cultural evolution much like general evolution works from the assumption that cultures are descendent from much earlier ancestors Human culture manifests itself in forms ranging from the small bands of hunters through intermediate scale complex hunter gatherers and farmers to the high density urban settlements and complex polities that characterize much of today's world The chapters in the volume examine the dynamic interaction between the micro and macro scales of cultural evolution developing a theoretical approach to the archaeological record that has been termed evolutionary processual archaeology The contributions in this volume integrate positive elements of both evolutionary and processualist schools of thought The approach as explicated by the contributors in this work offers novel insights into topics that include the emergence stasis collapse and extinction of cultural patterns and development of social inequalities Consequently these contributions form a stepping off point for a significant new range of cultural evolutionary studies

Human Ecology of Beringia John F. Hoffecker, Scott A. Elias, 2007 Twenty five thousand years ago sea level fell more than 400 feet below its present position as a consequence of the growth of immense ice sheets in the Northern Hemisphere A dry plain stretching 1 000 miles from the Arctic Ocean to the Aleutians became exposed between northeast Asia and Alaska and across that plain most likely walked the first people of the New World This book describes what is known about these people and the now partly submerged land named Beringia which they settled during the final millennia of the Ice Age Humans first occupied Beringia during a twilight period when rising sea levels had not yet caught up with warming climates Although the land bridge between northeast Asia and Alaska was still present warmer and wetter climates were rapidly transforming the Beringian steppe into shrub tundra This volume synthesizes current research some previously unpublished on the archaeological sites and rapidly changing climates and biota of the period suggesting that the absence of woody shrubs to help fire bone fuel may have been the barrier to earlier settlement and that from the outset the Beringians developed a postglacial economy similar to that of later northern interior peoples The book opens with a review of current research and the major problems and debates regarding the environment and archaeology of Beringia It then describes Beringian environments and the controversies surrounding their interpretation traces the evolving adaptations of early humans to the

cold environments of northern Eurasia which set the stage for the settlement of Beringia and provides a detailed account of the archaeological record in three chapters each of which is focused on a specific slice of time between 15 000 and 11 500 years ago In conclusion the authors present an interpretive summary of the human ecology of Beringia and discuss its relationship to the wider problem of the peopling of the New World **The Biology of Polar Regions** D.N.

History of Alaska , Volume I Jonathan M. Nielson, Ph.D., 2018-02-01 As a unique distant geographical region of the United States Alaska has evolved from military insignificance to high strategic priority in the 142 years since its purchase from Russia in 1867 The reasons for this dramatic shift derive from a correlation of geography foreign policy domestic politics and military technology Historically the role of the armed forces in Alaska has been large and diverse Alaska was one of the two principal territorial purchases made by the United States between 1803 and 1867 adding nearly 1 5 million square miles to America s national domain Smaller by the size of Texas than Jefferson s Louisiana Purchase Alaska unlike all of the territories and states carved out of the former languished in obscurity and isolation and was administered as a colonial dependency by the military and other branches of the federal government its official territorial status and government notwithstanding While sharing many common aspects of frontier settlement and Western history with territories such as Montana the Dakotas Wyoming and Colorado Alaska presented special challenges peculiar to a non contiguous arctic and sub Arctic environment separated from the United States by a foreign power Indeed only the defeated South under Reconstruction experienced the same degree of military occupation and martial law Alaska also has the unique distinction in the American experience of belonging to Imperial Russia before it became of interest to American expansionists Still others found Alaska tempting and pursued their own designs North of 53 The Spanish British Canadians and even the French plied Alaska s waters and made their claims to Alyeska the Great Land And it is with these clashing imperial ambitions that this three volume history begins
