politicians and government agencies By the 1990s wetlands across the United States were endangered from pollution and decades of drainage to convert them into farmland and urban developments But when deformed frogs many with missing legs or eyes footless stumps or misshapen jaws began to emerge from Minnesota wetlands alarm bells went off What caused such deformities Pollution Ultraviolet rays Biological agents And could the mysterious cause also pose a threat to humans Judy Helgen writes with passionate concern about vulnerable frogs and wetlands as she navigates through a maze of inquisitive media and a reluctant government agency She reports on the complexity of a growing catastrophe for frogs and broadens the issue as she researches and meets with scientists from around the world She affirms the importance of examining aquatic life to understand pollution and the need to rescue our remaining wetlands She also shares the fears expressed by the teachers students and other citizens who found these creatures sensed a problem and looked to her for answers Ultimately this is a story about the biological beauty of wetlands and our need to pay attention to the environment around us

In Search of Lost Frogs Robin Moore, 2014-09-11 The story of an expedition in search of the world's rarest and most exotic amphibians On August 9 2010 33 teams from 21 countries were dispatched to search for the Lost Frogs identified by Conservation International On their list were a host of species including in the top ten most wanted the Rio Pescado Stubfoot Toad found only in Ecuador which was to prove a triumphant

rediscovery Several months a number of key rediscoveries such as the Elegant Tropical Frog last seen in 1937 and the Chalazodes Bubble nest Frog last seen in 1874 and two new species later the Search for Lost Frogs had generated more than 650 news articles in 20 countries and over a billion potential viewers Author Robin Moore was responsible for spearheading the Search for Lost Frogs and coordinating the teams He also co led two expeditions to Colombia and Haiti In Colombia in search of the Mesopotamia Beaked Toad the steamy jungles of the Choco yielded not the desired species but a brand new one the Mr Burns Toad so called because of an uncanny resemblance to the Simpsons character the species was selected as one of Time magazine s top ten new species of 2010 In Haiti the team found six frogs last seen 20 years before including the Ventriloqual Frog named for its ability to throw its voice This fascinating new book tells the story of the expedition its highs and lows discoveries and failures and the campaign s ongoing work Despite the campaign one third of the world s amphibians remain threatened with extinction Most of the species searched for were not found But those that were provide a glimmer of hope Understanding why these species have survived when many others have not should help us understand what makes these species different In Search of Lost Frogs is a story of perseverance disappointment rediscovery resilience but ultimately of hope written with passion and illustrated with the author s superb photographs **Science** ,2001

Experimental Approaches to Conservation Biology Malcolm Gordon,Soraya Bartol,2004-09-13 We are living in the early stages of a looming worldwide extinction crisis Abundant evidence shows that the current rate of species extinctions is nearing its highest level since the asteroid collision 65 million years ago and that humans are largely responsible This book addresses the urgent need to understand and find solutions to this crisis Written by an international team of contributors who are among the best known and most active experimental biologists working in the field of conservation biology today it provides a unique approach by focusing on individual species rather than whole plant and animal communities Emphasizing throughout how conservation biology can benefit from an experimental approach the book looks at a wide range of terrestrial and aquatic species from giant pandas and tree snails to sea turtles and Steller sea lions and demonstrates what can be done both to preserve rare species and to combat invasive organisms Finally contributors show how we can bridge the gap between policy makers and research scientists in order to develop lasting solutions to these problems **Public Library Catalog** Juliette Yaakov,2004 More than 8 000 books in the main volume More than 2 400 new titles in annual paperbound supplements More than 2 000 analytic entries for items in collections and anthologies
