**Practice-Driven Research on Enterprise Transformation** Frank Harmsen, Frank Schalkwijk, Joseph Barjis, Sietse Overbeek, 2010-11-01 The PRET working conferences are set up as a one day event in such a way that it attracts an audience from both industry and academia PRET 2010 was a continuation of the PRET 2009 working conference which was organized as the industrial track at the 2009 CAiSE conference The PRET 2010 working conference was organized as part of the enterprise engineering week and was co located with PoEM 2010 and TEAR 2010 in Delft The statement that modern day enterprises are in a constant state of ux is in 2010 even more true than it was in 2009 The markets are in a state of confusion and seem to have no direction at all as they are swinging back and forth depending on often contradictory signals and economic forecasts As a consequence enterprises be they private businesses government departments or other organizations are taking their measures Restructuring divesting proving performance and merging are

among the usual transformation activities that enterprises conduct to provide answers to the ever challenging demands that are put on them. In addition to the tricky economic situation, developments like globalization, rapid technological advancement, aging, and the changing mindset of customers contribute to a situation in which nothing is certain anymore and in which change is the only constant. PRET approaches these developments and the impact they have on enterprises from a holistic enterprise engineering perspective.

*Imagining Organizations* Paolo Quattrone, Nigel Thrift, Chris Mclean, Francois-Regis Puyou, 2013-06-17

Organizations rely extensively upon a myriad of images and pictorial representations such as budgets, schedules, reports, graphs, and organizational charts, to name but a few. Visual images play an integral role in the process of organizing. This volume argues that images in organizations are performative, meaning that they can be seen as performances rather than mere representations that play a significant role in all kinds of organizational activities. *Imagining Organizations* opens up new ways of imagining business through an interdisciplinary approach that captures the role of visualizations and their performances. Contributions to this volume challenge this orthodox view to explore how images in business organizing and organizations are viewed in a static and rigid form. *Imagining Business* addresses the question of how we visualize organizations and their activities as an important aspect of managerial work, focusing on practices and performances, organizing and ordering, and media and technologies. Moreover, it aims to provide a focal point for the growing collection of studies that explore how various business artifacts draw on the power of the visual to enable various forms of organizing and organizations in diverse contexts.
