Bruce McClish,Kirsten Watts,1993     The Weather Watchers David Day,2007-01-01 Australia's capricious climate has tested its inhabitants for centuries For a colony of farmers knowing what the weather might bring was a matter of great moment But the small band of colonial meteorologists were hampered until telegrapher observations suddenly gave them the means to make rough predictions about the coming weather The founding of the Bureau of Meteorology in 1907 brought a new rigour to the work of meteorologists Yet it remained a Cinderella organisation until the advent of regular air services in the 1930s doubled its size and boosted the scope of its operations The Bureau more than doubled again when it became a vital part of the nation's defence effort in the Second World War Despite the important roles it played the limits of the science rudimentary technology and budgetary restrictions combined to make the Bureau a regular object of derision That gradually changed as the introduction of the radar satellites and computers and the growing understanding of meteorological science allowed the Bureau to make confident weather predictions several days in advance and even of the climate for coming seasons Today the Bureau of Meteorology operates the most popular government website providing real time radar and satellite data as well as forecasts and warnings of events from cyclones and bushfires to floods and droughts It also has one of the nation's most advanced computers gathering data on a global scale and running numerical models of the earth atmosphere ocean system to produce daily forecasts and research into the complex issue of climate change Part institutional history part drama and part natural history *The Weather Watchers* is a gripping story of the Bureau of Meteorology and the significant and often colourful figures who have been part of the Bureau since its inception 100 years ago     Weather Obsession Lawrie Zion,2017-07-31 We have come a long way since the days when weather information could only be found in the back pages of newspapers *The Weather Obsession* takes the temperature of modern weather media and investigates how it has fuelled our fascination with all things climatic Weather information now pervades everything from our mobile devices to online news and social media while the Bureau of Meteorology is a daily destination for millions of us What has made weather so much more than a mere talking point What happens when this data becomes big business And what is at stake when it comes to how the media frames our understanding of the relationship between extreme weather and climate change *The Weather Obsession* lifts the lid on our insatiable appetite for meteorological media and shows that while we might not have stopped worrying about the forecast almost all of us have learnt to love the BOM
