Short assignments at the close of each chapter encourage readers to look beyond the text to gain practical experience. Evaluation forms and evaluation key points allow instructors to gauge their teaching success and adapt the key criteria of a successful class to each exercise modality. The three part structure of this book is retained from the previous edition but the content is reorganized to better reflect industry standards and guidelines. Part I provides a general overview of group exercise, the evolution and advantages of group exercise, the strategies for creating group cohesion in a class, the core concepts in class design, and the use of music, choreography, and cueing methods in designing and leading a class. Part II offers guidelines for leading the four major segments of a group exercise class: warm up, cardiorespiratory training, muscular conditioning, and exibility training, and includes a new chapter on neuromotor and functional training. These basic concepts pertain to all modalities covered in part III, which focuses on practical teaching skills. Basic moves, choreography, and training systems are covered for each type of class. Sample routines and class formats for each modality offer a confident starting point for novice instructors and fresh material for veterans. The final chapter discusses customized or hybrid classes such as lifestyle, physical activity based classes, equipment based cardio classes, and mind and body classes.
