A Worldly Art The Dutch Republic 1585 1718:

The Art of the Dutch Republic, 1585-1718 Mariët Westermann, 2004 The art of the Dutch republic in the seventeenth century includes some of the most familiar and best loved examples of European painting exquisite still life studies tranquil interiors robust portraits and rowdy tavern scenes In this account Mariët Westermann describes this art as it was experienced by the people of the period and as it appears to us today She examines the major themes of Dutch art including the growth and expression of national identity the celebration and examination of the individual through portraiture and the changing status of artists themselves **BOOK JACKET** *A Worldly Art* Mariët Westermann, 1996 **THE ART OF THE DUTCH REPUBLIC 1585-1718** Mariët Westermann, 1996 **Worldly Art, 1585-1718** Westermann, 1996-01-01 *The Globalization of Netherlandish Art*, 2024-12-02 Is there a special place for the Low Countries in art history's current debates on global mobility How should we conceive of the globalization of Netherlandish art in the early modern period and in what ways does the distinctively worldly orientation of the Netherlands in this period contribute to early modern visual culture This volume examines how artworks produced in the wake of European expansion art produced in the Netherlands in reaction to the world outside of Europe and art made outside of Europe in reaction to encounters with the Netherlands help us better understand the cultural impacts of globalization *The Sublime in the Visual Culture of the Seventeenth-Century Dutch Republic* Stijn Bussels, Bram Van Oostveldt, 2023-11-07 Contrary to what Kant believed about the Dutch and their visual culture as being of an orderly and diligent position and thus having no feeling for the sublime this book argues that the sublime played an important role in seventeenth century Dutch visual culture By looking at different visualizations of exceptional heights divine presence political grandeur extreme violence and extraordinary artifacts the authors demonstrate how viewers were confronted with the sublime which evoked in them a combination of contrasting feelings of awe and fear attraction and repulsion In studying seventeenth century Dutch visual culture through the lens of notions of the sublime we can move beyond the traditional and still widespread views on Dutch art as the ultimate representation of everyday life and the expression of a prosperous society in terms of calmness neatness and order The book will be of interest to scholars working in art history visual culture architectural history and cultural history The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 International license Funded by Ghent University *The Art of the Dutch Republic, 1585-1718* Mariët Westermann, 1996 *Trade, Globalization, and Dutch Art and Architecture* Marsely Kehoe, 2025-10-01 We all look to our past to define our present but we don't always realize that our view of the past is shaped by subsequent events It's easy to forget that the Dutch dominated the world's oceans and trade in the seventeenth century when it's cultural imagination conjures up tulips and wooden shoes instead of spices and slavery This book examines the Dutch so called Golden Age though its artistic and architectural legacy recapturing the global dimensions of this period by looking beyond familiar artworks to

consider exotic collectibles and trade goods and the ways in which far flung colonial cities were made to look and feel like home Using the tools of art history to approach questions about memory history and how cultures define themselves this book demonstrates the centrality of material and visual culture to understanding history and cultural identity **Early Modern Women in the Low Countries** Susan Broomhall, Jennifer Spinks, 2016-05-13 Combining historical historiographical museological and touristic analysis this study investigates how late medieval and early modern women of the Low Countries expressed themselves through texts art architecture and material objects how they were represented by contemporaries and how they have been interpreted in modern academic and popular contexts Broomhall and Spinks analyse late medieval and early modern women s opportunities to narrate their experiences and ideas as well as the processes that have shaped their representation in the heritage and cultural tourism of the Netherlands and Belgium today The authors study female authored objects such as familial and political letters dolls houses account books visual sources funeral monuments and buildings commissioned by female patrons and further artworks as well as heritage sites streetscapes souvenirs and clothing with gendered historical resonances Employing an innovative range of materials from written sources to artworks material objects heritage sites and urban precincts the authors argue that interpretations of late medieval and early modern women s experiences by historians and art scholars interact with presentations by cultural and heritage tourism providers in significant ways that deserve closer interrogation by feminist researchers *A Concise History of the Netherlands* James C. Kennedy, 2017-07-13 This book offers a comprehensive yet compact history of this surprisingly little known but fascinating country from pre history to the present *Russian Culture, Property Rights, and the Market Economy* Uriel Procaccia, 2007-05-28 The Russian Federation is struggling since Perestroika and the Glasnost in a futile attempt to become a normal member in the occidental family of market economies The attempt largely fails because corporations do not live up to Western standards of behavior and private contracts are often not respected What is the cause of Russia s observed difficulties It is commonly believed that these difficulties are an expected outcome of a rocky transition from a Marxist centrally planned system to a market based economy This book challenges the accepted wisdom In tracing the history of contract and the corporation in the West it shows that the cultural infrastructure that gave rise to these patterns of economic behavior have never taken root on Russian soil This deep divide between Russian and Western cultures is hundreds of years old and has little if anything to do with the brief seventy year long experimentation with overtly Marxist ideology The transformation of Russia into a veritable market economy requires much more than an expensive and difficult transition period it mandates a radical change in her cultural underpinnings The book s main thesis is supported by an in depth comparison of Western and Russian theology philosophy literary and artistic achievements musical and architectural idioms and folk culture *The Origins of the Telescope* Albert Van Helden, Sven Dupré, Rob van Gent, 2010 The origins of the telescope have been discussed and debated since shortly after the instrument s appearance in The Hague in 1608 Civic and

national pride have led local dignitaries popular writers and numerous scholars to search the archives and to construct sharply divergent histories Did the honor of the invention belong to the Dutch to the Italians to the English or to the Spanish And if the city of Middelburg in the Netherlands was in fact the cradle of the instrument was the true inventor Hans Lipperhey or his rival Zacharias Jansen Or was the instrument there before anyone knew it Over the past several decades a group of historians and scientists have sought out new documents re examined familiar ones and tested early lenses and telescopes This volume contains the proceedings of a symposium held in Middelburg in September 2008 to mark 400 years of the telescope The essays in it taken as a whole present a new and convincing account of the origins of the instrument that changed mankind s vision of the universe

Everyday Phenomenology Derek Mitchell, 2012-11-30 No one who reads this book will ever see the world the same again Derek Mitchell s aim is to pursue phenomenology and therefore appearances obliquely in a number of areas Predominantly these are the appearances of houses landscapes places people and history but these specific studies coalesce into a more general theory about appearances place and time and thereby provide a phenomenology of the everyday In this pursuit the author brings together works of philosophy literature history and art in order to circumvent the apparent paradox of the ubiquity and inaccessibility of the everyday This makes the work wide ranging and extensive but by the end a delicate coherence and unity emerges from allowing the coming together of these different avenues of approach to appearances Philosophically speaking the author s guides through all of this are Martin Heidegger Hans Georg Gadamer and Gaston Bachelard with assistance notably from Descartes Hume Kant Hegel and Sartre although Mitchell endeavours to add some insights of his own as the book progresses Other significant contributions come from the works of W G Sebald Dennis Severs Rainer Maria Rilke Irene Nemirovsky the writing of David Hockney and some Dutch artists

Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book s incredible art program offer profound insight through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians With a truly humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years

A Dutch Republican Baroque Frans-Willem Korsten, 2025-10-01 In the Dutch Republic in its Baroque forms of art two aesthetic formal modes theatre and drama were dynamically related to two political concepts event and moment The Dutch version of the Baroque is characterised by a fascination with this world regarded as one possibility out of a plurality of potential worlds It is this fascination that explains the coincidence in the Dutch Republic strange at first sight of Baroque exuberance irregularity paradox and vertigo with scientific rigor regularity mathematical logic and rational distance In giving a new historical perspective on the Baroque as a specifically Dutch republican one this study also offers a new and systematic approach towards the interactions among the notions of theatricality dramatisation moment and event concepts that are currently at the centre of philosophical and political debates but the modern articulation of which can best be considered in the explorations of history and world in the Dutch Republic
