Akademiia nauk SSSR.*, 1988 High-Speed Atomic Force Microscopy in Biology Toshio Ando, 2022-03-23 This first book on high speed atomic force microscopy HS AFM is intended for students and biologists who want to use HS AFM in their research It provides straightforward explanations of the principle and techniques of AFM and HS AFM Numerous examples of HS AFM studies on proteins demonstrate how to apply this new form of microscopy to specific biological problems Several precautions for successful imaging and the preparation of cantilever tips and substrate surfaces will greatly benefit first time users of HS AFM In turn the instrumentation techniques detailed in Chapter 4 can be skipped but will be useful for engineers and scientists who want to develop the next generation of high speed scanning probe microscopes for biology The book is intended to facilitate the first time use of this new technique and to inspire students and researchers to tackle their own specific biological problems by directly observing dynamic events occurring in the nanoscopic world Microscopy in biology has recently entered a new era with the advent of high speed atomic force microscopy HS AFM Unlike optical microscopy electron microscopy and conventional slow AFM it allows us to directly observe biological molecules in physiological environments Molecular movies created using HS AFM can directly reveal how molecules behave and operate without the need for subsequent complex analyses and roundabout interpretations It also allows us to directly monitor morphological change in live cells and dynamic molecular events occurring on the surfaces of living bacteria and intracellular organelles As HS AFM instruments were recently commercialized in the near future HS AFM is expected to become a common tool in biology and will enhance and accelerate our understanding of biological phenomena

Assessment Reform in Science Benny B.H.W Yung,2006-01-09 The conclusions and recommendations made in the book are derived from a study of ten teachers in Hong Kong as they tried to change their practice following a reform of the Hong Kong assessment system Hong Kong is simply a context that provided the opportunity to gather very rich and informative data on issues pertaining to assessment reforms which also have very wide implications in many countries contexts The book is written for practising teachers teachers in training teacher educators policy makers and researchers who are interested in teachers classroom practices teacher beliefs teacher professionalism implementation of educational reforms in general and high stakes assessment reforms in particular The structure of the book is organized in a manner that rapidly presents the case stories of the teachers to the readers These stories can be helpful to all teachers whether in training or experienced in a number of ways 1 as a set of ideas to be debated upon and to act as a springboard for reflection on the purposes of assessment in education and on the role of teachers in these purposes 2 as examples of practice that can be compared to the readers own existing practices and 3 as a source of models of practice to apply and test in readers own classrooms These case stories are followed by a discussion of a number of issues that arise from this group of teachers beliefs and practices To cater for research oriented readers the relevant literature theoretical underpinnings and the intriguing research methodology that led to the case stories will appear as appendices

Biology of the Uterus W. Jollie,R.M. Wynn,2013-06-29 Almost a quarter of a century has elapsed since Cellular Biology of the Uterus the predecessor of the present volume was planned During that period especially in the decade since the publication of the last edition of Biology of the Uterus new information in the field has been so voluminous as to require major revisions of most of the chapters the addition of several new chapters and the collaboration of a second editor to facilitate the selection of appropriate experts as authors As in prior editions a balance has been struck between classical biology and modern biochemistry and biophysics The inclusion of basic histological and embryo logical information provides a necessary though often lacking background for the protein chemist and molecular biologist and a bridge between the cell biologist and clinician Thus major practical problems in human reproduction such as the genesis of endometrial carcinoma and the cause of the initiation of labor may be approached on a firm scientific footing The current edition deals primarily with the biology of the uterus itself comparative and human rather than placentation or pregnancy and thus is a synthesis of data derived from many techniques both conventional and modern As it is clearly beyond the competence of anyone scientist to prepare such a text on the basis of personal knowledge and experience the aid of 22 distinguished scientists was enlisted

can also be credited with the creation of both the science of biology and the philosophy of biology. He was the first thinker to treat the investigations of the living world as a distinct inquiry with its own special concepts and principles. This book focuses on a seminal event in the history of biology: Aristotle's delineation of a special branch of theoretical knowledge devoted to the systematic investigation of animals. Aristotle approached the creation of zoology with the tools of subtle and systematic philosophies of nature and of science that were then carefully tailored to the investigation of animals. The papers collected in this 2001 volume, written by a pre-eminent figure in the field of Aristotle's philosophy and biology, examine Aristotle's approach to biological inquiry and explanation, his concepts of matter, form, and kind, and his teleology.

Biological Threats and Terrorism Institute of Medicine, Board on Global Health, Forum on Emerging Infections, 2002-04-07

In the wake of September 11th and recent anthrax events, our nation's bioterrorism response capability has become an imminent priority for policymakers, researchers, public health officials, academia, and the private sector. In a three-day workshop convened by the Institute of Medicine's Forum on Emerging Infections, experts from each of these communities came together to identify, clarify, and prioritize the next steps that need to be taken in order to prepare and strengthen bioterrorism response capabilities. From the discussions, it became clear that of utmost urgency is the need to cast the issue of a response in an appropriate framework in order to attract the attention of Congress and the public in order to garner sufficient and sustainable support for such initiatives. No matter how the issue is cast, numerous workshop participants agreed that there are many gaps in the public health infrastructure and countermeasure capabilities that must be prioritized and addressed in order to assure a rapid and effective response to another bioterrorist attack.
