GCSE Biology Paper 1

What are the two types of cells? - Answer - • Eukaryotic (plant and animal)
• Prokaryotic (bacteria)

What are the differences between eukaryotic and prokaryotic cells? - Answer -
Prokaryotic cells are much smaller than eukaryotic cells.
Eukaryotic cells contain membrane bound-organelles and a nucleus containing genetic material, while prokaryotes do not.

How is genetic information stored in a prokaryotic cell? - Answer - Found free within the cytoplasm as:

- Chromosomal DNA (single large loop of circular DNA)
- Plasmid DNA

What are plasmids? - Answer - • Small, circular loops of DNA found free in the cytoplasm and separate from the main DNA.
• Carry genes that provide genetic advantages e.g. antibiotic resistance.

List the components of both plant and animal cells (5) - Answer - • Nucleus

- Cytoplasm
- Cell membrane
- Mitochondria
- Ribosomes

List the additional cell components found in plant cells (3) - Answer - • Chloroplasts

- Permanent vacuole
- Cell wall

Other than storing genetic information, what is the function of the nucleus? - Answer - Controls cellular activities

Describe the structure of the cytoplasm - Answer - • Fluid component of the cell.
• Contains organelles, enzymes and dissolved ions and nutrients.

What is the function of the cytoplasm? - Answer - Site of cellular reactions e.g. first stage of respiration.
Transport medium.

What is the function of the cell membrane? - Answer - Controls the entry and exit of materials into and out of the cell.

What is the function of the mitochondria? - Answer - Site of later stages of aerobic respiration in which ATP is produced.

Carnivores Emmanuel Do Linh San, Jun J. Sato, Jerrold L. Belant, Michael J. Somers, 2022-07-25 *Small Carnivores Evolution Ecology Behaviour and Conservation* This book focuses on the 232 species of the mammalian Order Carnivora with an average body mass 21.5 kg Small carnivores inhabit virtually all of the Earth's ecosystems adopting terrestrial semi fossorial semi arboreal or semi aquatic lifestyles They occupy multiple trophic levels and therefore play important roles in the regulation of ecosystems such as natural pest control seed dispersal and nutrient cycling In areas where humans have extirpated large carnivores small carnivores may become the dominant predators which may increase their abundance mesopredator release to the point that they can sometimes destabilize communities drive local extirpations and reduce overall biodiversity On the other hand one third of the world's small carnivores are threatened or near threatened with

extinction This results from regionally burgeoning human populations industrial and agricultural activities causing habitat reduction destruction fragmentation and pollution Overexploitation persecution and the impacts of introduced predators competitors and pathogens have also negatively affected many small carnivore species Although small carnivores have been intensively studied over the past decades bibliometric studies showed that they have not received the same attention given to large carnivores Furthermore there is huge disparity in how research efforts on small carnivores have been distributed with some species intensively studied and others superficially or not at all This book aims at filling a gap in the scientific literature by elucidating the important roles of and documenting the latest knowledge on the world s small carnivores pThis is a book that has been needed for decades It is the first compendium of recent research on a group of mammals which has received almost no attention before the early 1970s This book covers a wide range of subdisciplines and techniques and should be considered a solid baseline for further research on this little known group of highly interesting mammals As our knowledge regarding how ecosystems function increases then the valuable role of small carnivores and the necessity for their conservation should be regarded as of paramount importance The topics covered in this book should therefore be of great interest not only to academics and wildlife researchers but also to the interested layman [The Life, Extinction, and Rebreeding of Quagga Zebras](#) Peter Heywood,2022-05-19 Extinction of quagga zebras left behind historical records art literature and DNA whose information led to their rebreeding *Storage of Cereal Grains and Their Products* Kurt A.
