Heath Science Series Herman Schneider,Nina Schneider,1961 *Blank Darkness* Christopher L. Miller,1985 Blank Darkness Africanist Discourse in French is a brilliant and altogether convincing analysis of the way in which Western writers from Homer to the twentieth century have imposed their language of desire on the least known part of the world and have called it Africa There are excellent readings here of writers ranging from Baudelaire Rimbaud Sade and C line to Conrad and Yambo Ouologuem but even more impressive and important than these individual readings is Mr Miller s wide ranging incisive and exact analysis of Africanist discourse what it has been and what it has meant in the literature of the Western world James Olney Louisiana State University

Novel Methods in Molecular and Cellular Biochemistry of Muscle Grant N. Pierce,William C. Claycomb,2012-12-06

Experimental techniques are the life blood of science The better the methodology is the more reliable and accurate the results will be Ultimately this will lead to a clearer interpretation of those results and firmer conclusions from any set of experiments Experimental methodology in the area of cardiovascular biochemistry and molecular biology has advanced considerably in the last decade Because of these factors it was thought that a focused issue of Molecular and Cellular Biochemistry dedicated to the novel latest technological advances in the field was warranted We must thank Dr Naranjan S Dhalla Editor in Chief of Molecular and Cellular Biochemistry for his willingness to publish an issue with such a focus We have attracted some of the leaders in the field of cardiovascular biology to submit articles describing some of the most novel significant techniques currently in use in their laboratories The purpose of the manuscripts was not to describe the recent experimental findings from each laboratory as is done in most conventional manuscripts Instead the purpose of the articles found within this focused volume of Molecular and Cellular Biochemistry was to describe how the technique is performed on the laboratory bench so that others less familiar with the technique may be able to use it in their own labs The subjects described in this volume can be generally subdivided into three categories molecular biology cell biology and basic biochemistry The methods cover wide areas including various DNA and RNA expression technologies transfection techniques quantification of ion flux movement measurements of lipid metabolism advances in the culture of specific cardiovascular cell populations and the use of confocal microscopy to examine cell structure and function We thank all of the authors who have contributed so much of their time and efforts and most importantly shared the secrets of these valuable techniques with the rest of the cardiovascular research community
