Inscription has drawn much interest from scholars of various disciplines Yet in this volume Emeritus Professor Dr Ahmat Adam argues that scholarship on the Inscription has consistently misdated the stone and misrepresented its true content Through philological and historical analysis he argues that the correct date of the Inscription is not 702 H or 1303 A D but 708 H or 1308 A D and that the Inscription also reveals the usage of a unique calendrical system in the early 14th century alongside other clues to the nature of historical Malay society Accountability in education: meeting our commitments UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover **Global Perspectives on Teaching and Learning Paths in Islamic Education** Huda, Miftachul,Safar, Jimaain,Mohamed, Ahmad Kilani,Jasmi, Kamarul Azmi,Basiron, Bushrah,2019-07-26 The process of curriculum enhancement through various educational approaches aims to enhance quality assurance in the educational process itself In Islamic education traditional educational trends are enhanced by expanding the embodiment process on experiential learning to evaluate the achievement in creating outcomes that balance not only spirituality and morality but also quality of cognitive analytical performances Global Perspectives on Teaching and Learning Paths in Islamic Education is a comprehensive scholarly book that provides broad coverage on integrating emerging trends and technologies for developing learning paths within Islamic education Highlighting a wide range of topics such as digital ethics psychology and vocational education this book is ideal for instructors administrators principals curriculum designers professionals researchers academicians and students **Education for people and the planet: Creating sustainable futures for all** UNESCO,2016-09-12 This edition of the Global Education Monitoring Report GEM Report is the first in a series that will
