

Memorandum

Dated: 14 January 2023

To: Sales & Marketing Group

From: Praveenkumar Revankar, Product Engineering

Subject: Delay in release timelines of Feature A and Feature B.

Purpose:

The purpose of this document is to notify the cross-functional group about sudden changes in release timelines of Feature A and Feature B and to reinform the group to reprioritize certain tasks for Sales and Marketing for the release.

Background/Context:

We have been working together on our key USP features 'Feature A' and 'Feature B' for targeting their release this quarter. Due to unforeseen circumstances, there is a change in the release timelines and the new timeline will be shared shortly in Scrum of Scrum meeting where a representative from Sales has been invited.

Action:

Even though it looks like a major setback and current activities w.r.t. The release can be paused, there are certain actions that have to be performed in this quarter. The same has been conveyed in Jira, marking the work items with labels "Q1_Paused" and "Q1_Must." Please reprioritize your internal activities based on the labels in Jira and ensure a final plan reflected in Jira on or before 30 January 2023.

Conclusion:

We might be delayed with the release but we are not affecting the business. The necessary strategy is defined and put in place to ensure customers can solve their problems using our support until Feature A and Feature B release.

Thanks,
Praveenkumar Revankar

Boilogy Paper 2 Hg 2010 Memorandum

Nir Haim Buras

Boilogy Paper 2 Hg 2010 Memorandum:

The Science of Human Perfection Nathaniel Comfort, 2012-09-25 Almost daily we hear news stories advertisements and scientific reports that promise genetic medicine will make us live longer enable doctors to identify and treat diseases before they start and individualize our medical care But surprisingly a century ago eugenicists were making the same promises The Science of Human Perfection traces the history of the promises of medical genetics and of the medical dimension of eugenics The book also considers social and ethical issues that cast troublesome shadows over these fields

divDIV DIV Keeping his focus on America science historian Nathaniel Comfort introduces the community of scientists physicians and public health workers who have contributed to the development of medical genetics from the nineteenth century to today He argues that medical genetics is closely related to eugenics and indeed the two cannot be fully understood separately He also carefully examines how the desire to relieve suffering and to improve ourselves genetically though noble may be subverted History makes clear that as patients and consumers we must take ownership of genetic medicine using it intelligently knowledgeably and skeptically lest pernicious interests trump our own

div *The Computing Universe* Anthony J. G. Hey, Gyuri Pápay, 2015 This exciting and accessible book takes us on a journey from the early days of computers to the cutting edge research of the present day that will shape computing in the coming decades It introduces a fascinating cast of dreamers and inventors who brought these great technological developments into every corner of the modern world and will open up the universe of computing to anyone who has ever wondered where his or her smartphone came from

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world *The Art of*

Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities

World Ocean Assessment Alan Simcock, 2017-04-17 This United Nations report examines the current state of knowledge of the world's oceans for policymakers and provides a reference for marine science courses **Salivary Bioscience**

Douglas A. Granger, Marcus K. Taylor, 2020-04-07 This book provides the first comprehensive overview of the emerging field of interdisciplinary salivary bioscience. It serves as a foundational reference guide to the collection, analysis, and interpretation of salivary data as well as its myriad applications in medicine, surveillance, and public health. The ease and non-invasive nature of saliva collection makes it highly useful in diverse fields such as pediatrics, dentistry, neuroscience, psychology, animal welfare, and precision medicine. This book introduces students and scientists alike to the vast potential of salivary bioscience in both research and practice. *The Marine Fish Fauna of the Middle Pleistocene Port Orford Formation and Elk River Beds, Cape Blanco, Oregon* BRUCE J. Uyarra, Jacob Carstensen, Marianna Mea, 2017-03-22 Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries, a feature especially important in the interconnected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money, and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal, and management mechanisms to ensure that the use of such benefits does not impact on environmental quality but instead supports its sustainable use. **The Morbid Age** R. J. Overy, Richard Overy, 2010 British intellectual life between the wars stood at the heart of modernity. The Morbid Age opens a window on to this creative but anxious era, the golden age of the public intellectual and scientist. Arnold Toynbee, Aldous Huxley, Julian Huxley, H. G. Wells, Marie Stopes, and a host of others. Yet as Richard Overy argues, a striking characteristic of so many of the ideas that emerged from this new age, from eugenics to Freud's unconscious to modern ideas of pacifism and world government, was the fear that the West was facing a possibly terminal crisis of civilization. Ultimately, Overy shows, the coming of war was almost welcomed as a way to resolve the contradictions and anxieties of this period, a war in which it was believed civilization would be either saved or utterly destroyed. **California Cooperative Oceanic Fisheries Investigations Progress Report**, 2010 **Assessing Environmental Risk of Oil Spills with ERA Acute** Cathrine Stephansen, Anders Bjørgesæter, Odd Willy Brude, Ute Brønner, Tonje Waterloo Rogstad, Grethe Kjeilen-Eilertsen, Jean-Marie Libre, Christian Collin-Hansen, 2021-05-05 This open access book introduces readers to a new methodology for assessing the risks to the

marine environment following accidental oil spills The methodology will soon be implemented on the Norwegian Continental Shelf and will be complemented by guidelines for its use in a regulatory framework The brief book is intended to provide international readers with a basic grasp of what the ERA Acute methodology consists of what its applications are and the underlying impact and restoration models used in its development The content is divided into three main parts an introduction and overview of risk management applications for generalists at the management level a model overview for generalist scientists and a more detailed final section for risk assessment professionals which presents the results of the validation and sensitivity testing

Offshore Mechatronics Systems Engineering Hamid Reza Karimi, 2018-07-04 The book gives a systematical and almost self contained description of the many facets of envisaging designing implementing or experimentally exploring offshore mechatronics and systems along the adequate designs of integrated modeling safety control and supervision infrastructure With the rapid improvements in offshore technologies in various fields such as oil and gas industry wind energy robotics and logistics many researchers in academia and industry have focused on technology based challenges raised in offshore environment This book introduces novel theoretical or practical techniques for offshore mechatronics systems Chapters cover general application model based systems engineering wind energy control systems mechanics health monitoring safety critical human machine systems logistics and offshore industrial complexes such as oil and gas operations robotics large space structures and autonomous underwater vehicles and some other advanced technologies The core feature of this book is that of establishing synergies of modeling control computing and mechanics in order to achieve not only robust plant system operation but also properties such as safety cost integrity and survivability while retaining desired performance quality The book provides innovative insights into applications aspects and theoretical understanding of complex offshore mechatronics systems that has emerged in recent years either via physical implementations or via extensive computer simulations in addition to sound innovated theoretical developments It will serve as a reference for graduate and postgraduate students and for researchers in all engineering disciplines including mechanical engineering electrical engineering and applied mathematics to explore the state of the art techniques for solving problems of integrated modeling control and supervision of complex offshore plants with collective safety and robustness Thus it shall be useful as a guidance for system engineering practitioners and system theoretic researchers alike

Greening Europe Anna-Katharina Wöbse, Patrick Kupper, 2021-12-20 Today the environment seems omnipresent in European policy within and beyond the European Union The idea of a shared European environment however has come a long way and is still being contested Greening Europe focuses on the many ways people have interacted

with nature and made it an issue of European concern The authors ask how notions of Europe mattered in these activities and they expose the many entanglements of activists across the subcontinent who set out to connect and network and to exchange knowledge worldviews and strategies that exceeded their national horizons Moving beyond human agency the handbook also highlights the eminent role nature played in both greening Europe and making Europe a shared environment
