Revisiting Wertheimer's Seminars Abraham S. Luchins, Edith Hirsch Luchins, 1978 There two volumes reconstruct the interdisciplinary seminars conducted by Max Wertheimer at the New School for Social Research during the years 1936 to 1942 , *Transforming Talk into Text—Argument Writing, Inquiry, and Discussion, Grades 6-12* Thomas M. McCann, 2014-05-23 Author Thomas McCann invites readers to rethink their approach to teaching writing by capitalizing on students instinctive desire to talk Drawing on extensive classroom research he shows teachers how to craft class discussions that build students skills of analysis problem solving and argumentation as a means of improving student writing McCann demonstrates how authentic discussions immerse learners in practices that become important when they write Chapters feature portraits of teachers at work including transcripts that reveal patterns of talk across a set of lessons Interviews with the teachers and samples of student writing afford readers a deeper understanding of process Students also report on how classroom discussions supported their effort to produce persuasive argument driven essays Book Features A focus on the thinking behind the practice as opposed to a collection of lesson ideas Connections to important elements from the Common Core State Standards especially arguments writing Examples of students at work with examples of the writing that emerges from their discussions Portraits of skilled teachers as they

promote inquiry and sequence and facilitate discussions Appendices with problem based scenarios interview questions for students and teachers samples of debatable cases in the news and more In this important book Tom McCann has given us not only the admonition to change but the details about what effective change must be and what it looks like evidence that it works effectively and details about how to bring it to pass From the Foreword by George Hillocks Jr Professor Emeritus Department of English University of Chicago For a professional book to have an impact on the field it needs to address a perceived need Writing arguments for Common Core performance assessments is a HUGE need right now that this book helps address Carol Jago associate director California Reading and Literature Project UCLA *The Art of Being Human* Michael Rose,2022-12-04 Fake news genetic engineering designer babies Big Pharma incipient totalitarian rule the destruction of books transhumanism the desire to play God and the serial misuse of the word science it may sound a lot like America in the 2020s but these politically charged modern concerns have been probed deeply in classic fiction by a host of prescient authors over the past two centuries The Art of Being Human draws some much needed attention to the impact great literature can and does have especially in the realm of the cautionary tale in considering how we might learn from the past in order to inform our present decisions and plan for the future all the while maintaining our humanity amid a dehumanizing world **Teaching the Canon in 21st Century Classrooms** Michael Macaluso,Kati Macaluso,2018-11-01 The canon as much an ideology as it is a body of texts perceived to be intrinsic to the high school English classroom has come under scrutiny for maintaining status quo narratives about whiteness masculinity heterosexuality ability and even those associated with American ideals of self reliance the good life and the self made man Teaching practices around these texts may also reinforce harmful practices and ways of thinking including those connected to notions of culture literary merit and methods of reading teaching and learning Teaching the Canon in 21st Century Classrooms offers innovative critical ways of reading thinking about and teaching canonical texts in 21st century classrooms Responding to the increasingly pluralized digitized global 21st century English classroom chapter authors make explicit the ideologies of a canonical text of focus while also elaborating a pedagogical approach that de centers the canon bridges past and present applies critical theory and celebrates the rich identities of 21st century readers In using this book teachers will be especially poised to take on the canon in their classroom and thus to open up their curricula to ideas values concerns and narratives beyond those embedded in the canonical texts **On Our Minds** Eric M. Gander,2004-12-01 There is no question more fundamental to human existence than that posed by the nature versus nurture debate For much of the past century it was widely believed that there was no essential human nature and that people could be educated or socialized to thrive in almost any imaginable culture Today that orthodoxy is being directly and forcefully challenged by a new science of the mind evolutionary psychology Like the theory of evolution itself the implications of evolutionary psychology are provocative and unsettling Rather than viewing the human mind as a mysterious black box or a blank slate evolutionary psychologists see it as a physical organ that has

evolved to process certain types of information in certain ways that enables us to thrive only in certain types of cultures In *On Our Minds* Eric M Gander examines all sides of the public debate between evolutionary psychologists and their critics Paying particularly close attention to the popular science writings of Steven Pinker Edward O Wilson Richard Dawkins and Stephen Jay Gould Gander traces the history of the controversy succinctly summarizes the claims and theories of the evolutionary psychologists dissects the various arguments deployed by each side and considers in detail the far reaching ramifications social cultural and political of this debate Gander s lucid and highly readable account concludes that evolutionary psychology now holds the potential to answer our oldest and most profound moral and philosophical questions fundamentally changing our self perception as a species

Ethics and Law in Biological Research Cosimo Marco Mazzoni,2002-04-11 Scientific research on biotechnologies has become the protagonist of discoveries that exert a formidable impact on public opinion Every day popular opinion is challenged by the media so that it becomes not only a witness of these developments but is also to a certain extent forced to become a judge of those cases where human and animal genetics have been investigated over the last decades The man in the street is thus confronted by moral positions ranging from cautious approval to wait and see attitudes to unconditional condemnation On the other hand scientists are involved in the ethical evaluation of the results of their own research However the results of scientific pursuits are capable of producing immediate effects on the daily life of every human being Consequently alongside the scientists people feel strongly about their need and their right to contribute to an accurate assessment of the effects of science on society This is a collection of essays reflecting a considerable range of different cultural experiences and different ethical underpinnings The main subject is cloning Cloning is the most accessible and most readily perceived point of convergence from which ethical judgments on the current developments of scientific investigations can be proposed Cloning is also the paradox on which the confrontation between scientific research and popular imagination is focused
