The Central Government-Funded Teacher Education Policy in China Yi Liu,2023-10-20 This book utilises expectancy value theory and undermining effect of extrinsic reward theory to examine the impact of the Central Government Funded Teacher Education CGFTE policy on Chinese pre service teachers motivations for choosing the teaching profession Quantitative data analysis revealed six distinct categories of motivations to teach teacher influence job advantages extrinsic social value altruistic personal interest intrinsic others suggestions and fallback career These categories were further exemplified in ten narrative stories The findings indicate that the CGFTE policy attracts high school graduates with higher intrinsic motivation to enrol in teacher training programs but it seems ineffective in increasing their intrinsic career choice motivation It is argued that the CGFTE policy which emphasises extrinsic benefits but limits professional development does not have a significant negative impact on pre service teachers motivation to choose teaching This conclusion is supported by the offsetting effects of the policy s restrictive and encouraging aspects as explained by expectancy value theory and the qualitative data Nevertheless the intrinsic motivation of policy funded pre service teachers did not improve as much as that of their self supported counterparts indicating potential undermining effects of the policy The study concludes by discussing the implications of these findings for enhancing the CGFTE policy teacher training and career education in China The book will be an essential read for students and scholars of higher education Chinese studies and educational studies in general
