Notes on Building Construction UNKNOWN. AUTHOR,2015-06-26 Excerpt from Notes on Building Construction Arranged to Meet the Requirements of the Syllabus of the Board of Education South Kensington These Notes are intended to furnish a Student with information amply sufficient to enable him to pass the Honours Examination of the Science and Art Department so far as a knowledge of Building Materials is concerned They have however been extended somewhat beyond what is actually necessary for this purpose by the addition of Tables and information of a practical nature which it is hoped may be useful to young Engineers Architects and others engaged in the design and erection of structures of different kinds It was considered that a work upon materials written merely to meet the requirements of students in the Second Stage of the Science Examinations would be unsatisfactory Such a work would contain very elementary information on the subject It would be so condensed that it would not give a fair idea of the great differences which exist in the characteristics and qualities of even ordinary building materials and being thus narrowly restricted it would tend to encourage the pernicious practice of cramming In order to keep the bulk of the work within reasonable bounds it has been necessary strictly to limit the scope of the Notes It will be well therefore to state exactly what they are meant to contain and what is purposely excluded About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Building Construction in Warm Climates** Richard Lewis Fullerton,1977
