3. Study each of your maps of Pangaea

- How well do the continents fit together?

They fit pretty well, but I don't think they fit as well as when Pangaea existed. The way these continents fit on the map.

- Is it perfect fit?

No, this is a perfect fit because all of the continents fit pretty well and it is a perfect fit because most of the land is there when together.

- How does the fit of the continents get from where they were to where they are today? Think of some evidence that the continents could have moved the way they fit.

No, they could have moved the way they moved all the pieces into the way they fit together. This is possible because the continents could have moved hundreds of the miles during the 100-150.
