A Rulebook for Decision Making

George Pullman, 2015-03-05 Pullman offers his readers essential insights into how humans reason and make decisions Both concise and far reaching his work teaches us how to challenge intuitive logic and examine the processes for deliberative reasoning This text will prove foundational for students in their intellectual journey toward the development of real skills in critical thinking By pointing to simple yet profound examples Pullman s text is both readable and provocative as it challenges us to consider the very mechanisms by which we understand our own cognitive biases Bradley A Hammer Department of English and Comparative Literature University of North Carolina Chapel Hill **Christian Philosophy** Craig G. Bartholomew, Michael W. Goheen, 2013-10-15 This third book in a series of successful introductory textbooks by Craig Bartholomew and Michael Goheen builds on their previous projects *The Drama of Scripture* and *Living at the Crossroads* to offer a comprehensive narrative of philosophical thought from a distinctly Christian perspective After exploring the interaction among Scripture worldview theology and philosophy the authors tell the story of philosophy from ancient Greece through postmodern times positioning the philosophers in their historical contexts and providing Christian critique along the way The authors emphasize the Reformed philosophical tradition without neglecting other historical trajectories and show how philosophical thought relates to contemporary life *Engineering Speaking by Design* Edward J. Rothwell, Michael J. Cloud, 2017-12-19 From the Authors of *Engineering Writing by Design* *Creating Formal Documents of Lasting Value* Engineering presentations are often a topic of frustration Engineers complain that they don t enjoy public speaking and that they don t know how to address audiences with varying levels of technical knowledge Their colleagues complain about the state of information transfer in the profession Non engineers complain that engineers are boring and talk over everybody s heads Although many public speaking books exist most concentrate on surface issues failing to distinguish the formal oral technical presentation from general public speaking *Engineering Speaking by Design* *Delivering Technical Presentations with Real Impact* targets the formal oral technical presentation skills needed to succeed in modern engineering Providing clear and concise instruction supported by illustrative examples the book explains how to avoid logical fallacies both formal and informal use physical reasoning to catch mistakes in claims master the essentials of presentation style conquer the elements of mathematical exposition and forge a connection with the audience Each chapter ends with a convenient checklist bulleted summary and set of exercises A solutions manual is available with qualifying course adoption Yet the book s most unique feature is its conceptual organization around the engineering design process This is the process taught in most engineering survey courses understand the problem collect relevant information generate alternative solutions choose a preferred solution refine the chosen solution and so on Since virtually all engineers learn and practice this process it is so familiar that it can be applied seamlessly to formal oral technical presentations Thus *Engineering Speaking by Design* *Delivering Technical Presentations with Real Impact* is inherently valuable in that it shows engineers how to leverage what they already know The book s mantra is if you can think like an engineer you can speak like an engineer A 21st Century

Ethical Toolbox Anthony Weston, 2018 A 21st Century Ethical Toolbox invites students to think beyond the rigid pro and con positions of tough ethical problems by developing creative problem solving skills moral vision and genuine dialogue Provocative selections from a wide range of philosophers essayists community activists and students are interwoven with Weston's own discussions to equip students with the tools they need to think critically about contentious issues Statistics and the Quest for Quality Journalism Alessandro Martinisi, Jairo Alfonso Lugo-Ocando, 2020-10-29 This book looks at how numbers and statistics have been used to underpin quality in news reporting In doing so the aim is to challenge some common assumptions about how journalists engage and use statistics in their quest for quality news It seeks to improve our understanding about the usage of data and statistics as a primary means for the construction of social reality This is a task in our view that is urgent in times of post truth politics and the rise of fake news In this sense the quest to produce quality news which seems to require incorporating statistics and engaging with data as laudable and straightforward as it sounds is instead far more problematic and complex than what is often accounted for *Innovating* Luis Perez-Breva, 2017-02-10 Discover the MIT developed doer's approach to innovation with this guide that reveals you don't need an earth shattering idea to create a standout product service or business just a hunch that you can scale up to impact Innovation is the subject of countless books and courses but there's very little out there about how you actually innovate Innovation and entrepreneurship are not one and the same although aspiring innovators often think of them that way They are told to get an idea and a team and to build a show and tell for potential investors In *Innovating* Luis Perez Breva describes another approach a doer's approach developed over a decade at MIT and internationally in workshops classes and companies He shows that innovating doesn't require an earth shattering idea all it takes is a hunch Anyone can do it By prototyping a problem and learning by being wrong innovating can be scaled up to make an impact As Perez Breva demonstrates nothing is new at the outset of what we only later celebrate as innovation In *Innovating* the process illustrated by unique and dynamic artwork is shown to be empirical experimental nonlinear and incremental You give your hunch the structure of a problem Anything can be a part Your innovating accrues other people's knowledge and skills Perez Breva describes how to create a kit for innovating and outlines questions that will help you think in new ways Finally he shows how to systematize what you've learned to advocate communicate scale up manage innovating continuously and document you need a notebook to converse with yourself he advises Everyone interested in innovating also needs to read this book Millionaire Mystique Jude Miller Burke, 2014-09-22 In *The Millionaire Mystique* Jude Miller Burke PhD examines today's self-made female millionaires and shows how they successfully manage career and family life What can other ambitious women learn from them Miller Burke backs up her findings using results from an in-depth study of over 100 millionaire women In *The Millionaire Mystique* you'll learn how to balance your responsibilities at both work and home without guilt what personality factors wealthy working women have in common and how to foster them for yourself how to

develop the most critical traits for overcoming obstacles to success and how you can use your childhood and early career experiences to create a direct pathway to your goals

Change Leadership in Higher Education Jeffrey L.

Buller, 2014-12-02 Initiate innovation and get things done with a guide to the process of academic change Change Leadership in Higher Education is a call to action urging administrators in higher education to get proactive about change The author applies positive and creative leadership principles to the issue of leading change in higher education providing a much needed blueprint for changing the way change happens and how the system reacts Readers will examine four different models of change and look at change itself through ten different analytical lenses to highlight the areas where the current approach could be beneficially altered The book accounts for the nuances in higher education culture and environment and helps administrators see that change is natural and valuable and can be addressed in creative and innovative ways The traditional model of education has been disrupted by MOOCs faculty unions online instruction helicopter parents and much more leaving academic leaders accustomed to managing change Leading change however is unfamiliar territory This book is a guide to being proactive about change in a way that ensures a healthy future for the institution complete with models and tools that help lead the way Readers will Learn to lead change instead of simply managing it Examine different models of change and redefine existing approaches Discover a blueprint for changing the process of change Analyze academic change through different lenses to gain a wider perspective Leading change involves some challenges but this useful guide is a strong conceptual and pragmatic resource for forecasting those challenges and going in prepared Administrators and faculty no longer satisfied with the status quo can look to Change Leadership in Higher Education for real actionable guidance on getting change accomplished
