**A World United or a World Exploited?** Peter Price, 2014-09-01 The processes of globalisation are reshaping our world dramatically and rapidly The great issues of our day emphasise that we are all in this together startling inequalities pressures on the environment continuing hunger and poverty climate change economic integration mass migrations instant communications and recurring armed conflicts *A Strange Goodness?* Stephen Ames, 2024-04-01 This book is about all the suffering and death produced by natural processes like tsunamis genetic disorders extreme weather events even before climate change and the whole evolutionary process leading to all living things on the planet The book is not about the violence men and women wilfully do to each other and to the planet Many people find all this suffering and death due to natural processes hard to reconcile with the belief that these natural processes are created by a God who is all powerful all knowing and wholly good They expect such a God to create a different kind of universe without such suffering and death The actual universe contradicts the universe expected This is good enough reason for many people to decide to give up believing in God who is the creator of these natural processes The book is an invitation for people to revisit that decision The book comes from the author co designing and co lecturing with his atheist colleagues in History and Philosophy of Science at The University of Melbourne a second year subject God and the Natural Sciences This took place over twenty years Students with a wide variety of beliefs enrolled in the subject from across the university The book has three chapters The first clarifies the problem in the problem of natural evil to ensure we are not talking past each other The second chapter gives my answer to the problem of natural evil I argue from this idea of God to the kind of universe we should expect God to create The expected universe is found not to contradict the actual universe The third chapter is Reality Checks nine ways of testing the account of the kind of universe we should expect God to create The book has an appendix where I discuss alternative ideas of God that are in circulation and address several other criticisms of the idea of God besides the problem of natural evil

**Still Waters Run Deep** John Swinton, Elizabeth MacKinlay, 2023-09-26 This book brings together theologians clergy people with dementia carers clinicians and others to offer a holistic interdisciplinary exploration of dementia which focuses not only on what dementia is and what it is not but more importantly what it means to live well with dementia and to find hope where sometimes it feels like there is no hope Located within practical theology and theological anthropology the diversity of perspectives on dementia presented in this book offers deep insights into what it means to be a human being to live humanly in the midst of difficult situations and helps us understand and navigate the complexities of the dementia journey In offering foundational practical and theoretical knowledge the book helps cut through

the false consciousness of modernity and enter a world where personhood is defined not by our capacities or the loss of them but by God's loving presence. It offers a contextual theological framework to look beyond what we assume to be obvious and to recognize the hidden depths that can be discovered and encountered within individuals as they journey into dementia. In doing so, it takes seriously the lived experience of people with dementia and allows that to shape form and perhaps reform our understandings of God, human beings, and what it means to live well. Taken as a whole, the book posits that together we can reflect upon and act out a hopeful future that makes people's lives meaningful, purposeful, and loving even in the midst of the challenges that dementia brings. *Still Waters Run Deep* will be a key resource for academics, researchers, and advanced students of theology, divinity, and religious studies, gerontology, psychology, mental health, and nursing. The chapters included in this book were originally published as a special issue of *Journal of Religion, Spirituality, Aging*.

Hall, 2003-11-10 In The American Empire and the Fourth World Anthony Hall presents a sweeping analysis of encounters between indigenous people and the European empires national governments and global corporations on the moving frontiers of globalization since Columbus discovered America How should we respond to the emergence of the United States as the military commercial and cultural centre of a global empire How can we elaborate a global rule of law based on equality and democracy when the world's most powerful polity acknowledges no higher authority in the international arena than its own domestic priorities For

Hall the answer lies in the concept of the Fourth World an inclusive intellectual tent covering a wide range of movements whose leaders seek to implement alternative views of globalization Larger than any earlier political movement the Fourth World embraces basic principles that include the inherent rights of self determination and a more just approach to the crafting and enforcement of international law

**The Bowl with One Spoon: The American empire and the fourth world** Tony Hall, 2003 How should citizens of the world respond to the emergence of the United States as the planet's sole superpower and the military commercial and cultural centre of a new kind of global empire This question poses the central dilemma of our time How can we elaborate a global rule of law based on principles of equality and democracy when the world's most powerful polity seemingly acknowledges no higher authority in the international arena than its own domestic priorities For Anthony Hall the answer lies in the concept of the Fourth World an inclusive intellectual tent covering a wide range of movements whose leaders have sought to implement alternative visions of globalization to those that have prevailed since the Columbian conquests began in 1492 Its basic principles include recognition of the inherent rights of all peoples to self determination and an enlightened embrace of the ecology of biocultural diversity role of the United States began at its founding The Royal Proclamation of 1763 which offered a qualified recognition of Aboriginal and treaty rights infuriated many Anglo American colonists Their resulting sense of grievance was articulated in the Declaration of Independence which proclaims the inalienable rights of all men even as it accuses King George III of having endeavoured to bring on the inhabitants of our frontiers the merciless Indian savages The United States has never faced let alone resolved this fundamental contradiction in its founding document This failure manifested itself in the lawlessness and militarism that characterized US treatment of Indigenous peoples in the most formative phase of the country's frontier expansionism The exclusion of savages from the republic's founding ideals of human equality came increasingly to permeate US foreign policy culminating in the ethnic and religious prejudices colouring the so called War on Terrorism policies toward Aboriginals that have done much to shape the interconnected histories of the United States Canada Latin America South Africa Australia New Zealand and many other countries
