Place in Research Eve Tuck, Marcia McKenzie, 2014-08-07 Bridging environmental and Indigenous studies and drawing on critical geography spatial theory new materialist theory and decolonizing theory this dynamic volume examines the sometimes overlooked significance of place in social science research There are often important divergences and even competing logics at work in these areas of research some which may indeed be incommensurable This volume explores how researchers around the globe are coming to terms both theoretically and practically with place in the context of settler colonialism globalization and environmental degradation Tuck and McKenzie outline a trajectory of critical place inquiry that not only furthers empirical knowledge but ethically imagines new possibilities for collaboration and action Critical place inquiry can involve a range of research methodologies this volume argues that what matters is how the chosen methodology engages conceptually with place in order to mobilize methods that enable data collection and analyses that address place explicitly and politically Unlike other approaches that attempt to superficially tag on Indigenous concerns decolonizing conceptualizations of land and place and Indigenous methods are central not peripheral to practices of critical place inquiry

The Invention of God in Indigenous Societies James Cox,2014-09-19 Indigenous societies around the world have been historically disparaged by European explorers colonial officials and Christian missionaries Nowhere was this more evident than in early descriptions of indigenous religions as savage primitive superstitious and fetishistic Liberal intellectuals both indigenous and colonial reacted to this by claiming that before indigenous peoples ever encountered Europeans they all believed in a Supreme Being *The Invention of God in Indigenous Societies* argues that by alleging that God can be located at the core of pre Christian cultures this claim effectively invents a tradition which only makes sense theologically if God has never left himself without a witness Examining a range of indigenous religions from North America Africa and Australasia the Shona of Zimbabwe the Rainbow Spirit Theology in Australia the Yupiit of Alaska and the M ori of New Zealand the book argues that the interests of indigenous societies are best served by carefully describing their religious beliefs and practices using historical and phenomenological methods just as would be done in the study of any world religion

Cultural Methods in Psychology Kate C. McLean,2022 As I sat down to write this chapter about the use of life story methods for capturing cultural historical aspects of LGBTQ identity development I was transported back in time It was a hot summer day in 2004 I had travelled back from the big city where I was attending university to visit my family This was my first summer away from home At that moment my family and I sat in the parking lot of a diner having just finished breakfast at a local greasy spoon a ritualistic send off before I started my four hour return drive In those moments our car felt unusually cramped My dad was in the back seat with me my mom and brother in the front I didn t have much of an appetite that morning knowing that in mere minutes I would come out to my family as gay On our way out of the restaurant walking to our separate cars I somehow managed to muster up the courage to tell my family there was something important I wanted them to know So there I was in the backseat of the car with a message for my family Looking back on it the message was more like an ultimatum They could learn to love this new version of me as I had done or our routine see you later might be a goodbye This is the beginning of my story both my coming out story and in some ways my life story Thankfully my family is still an important part of this story

They Came But Could Not Conquer Diane J. Purvis,2024-05 As the environmental justice movement slowly builds momentum Diane J Purvis highlights the work of Indigenous peoples in Alaska s small rural villages who have faced incredible odds throughout history yet have built political clout fueled by vigorous common cause in defense of their homes and livelihood Starting with the transition from Russian to American occupation of Alaska Alaska Natives have battled with oil and gas corporations fought against U S plans to explode thermonuclear bombs on the edge of

Native villages litigated against political plans to flood Native homes sought recompense for the Exxon Valdez oil spill disaster and struggled against the federal government's fishing restrictions that altered Native paths for subsistence. In *They Came but Could Not Conquer* Purvis presents twelve environmental crises that occurred when isolated villages were threatened by a governmental monolith or big business. In each Native peoples rallied together to protect their land waters resources and a way of life against the bulldozer of unwanted often dangerous alterations labeled as progress. In this gripping narrative Purvis shares the inspiring stories of those who possessed little influence over big business and regulations yet were able to protect their traditional lands and waterways anyway.

Our Way Julie Cajune, 2023-10-10 Indigenous History Is American History *Our Way A Parallel History* dispels the myths stereotypes and absence of information about American Indian Native Alaskan and Native Hawaiian people in the master narrative of US history. For most of American history stories of the country's Indigenous Peoples were either ignored or told by outsiders. This book corrects these errors exploring the ways in which Indigenous cultures from every corner of the nation have influenced American society from the past into the present reminding the reader that they have both shaped the US and continue to play a vital role in its story. Significantly *Our Way A Parallel History* is a collaboration of Native scholars representing more than ten Indigenous nations sharing their histories and their cultures. Each contributor either an affiliate of an institution of higher education or a prominent Native leader provides the reader with an inside account of tribal culture and heritage. The result is a comprehensive resource restoring the histories of Indigenous Peoples and their nations to their rightful place in the story of America. The book covers topics such as The Doctrine of Discovery Alaska Native Claims Settlement Act US American Indian Policy and Civil rights Blood Quantum Selling Hawaii Lots More. As Julie Cajune Salish notes in the preface I believe this collection of history story and reflection provokes and invites us to think and feel deeply about what it means for all of us to be human in our communities nations and beyond. After all that is what a good story does.

Child Development in Africa Robert Serpell, Kofi Marfo, 2014 In this volume African scholars engaged in research on the continent reflect on their recent and ongoing empirical studies. They discuss the strengths and limitations of research methods theories and interventions designed outside Africa to spur innovative research on the continent. And they explore how insights from African philosophical theoretical and empirical work can be combined with exogenous forms of knowledge to generate understanding of the processes of African children's development in ways that are responsive to local contexts and meaningful for indigenous stakeholders. A new field of African child development research is emerging in African societies focusing on children as valued and vulnerable members of society and potential civic leaders of the future. Systematic inquiries are now designed to enhance our understanding of how African children think to discover effective ways of communicating with them and to inform successful strategies of promoting their health education and preparation for adult responsibilities in society. This is the 146th volume in this Jossey Bass series *New Directions for Child and Adolescent Development*. Its mission is to

provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area Each volume focuses on a specific new direction or research topic and is edited by experts from that field
