disaster cycle framework to compare and analyse a range of catastrophes in different spheres the author draws on ideas from a variety of disciplines including economics and economic history disaster studies management and political science This unique comparative approach presents case studies of several important disasters Hurricane Katrina the First World War the depression of the early 1930s Welsh coal mining accidents the deadly effects of smoking tobacco and the Global Financial Crisis and Eurozone catastrophe of the early twenty first century The author argues that economists and economic policy makers routinely misuse the term crisis to describe episodes that ought to be called disasters This accessible and fascinating exploration will appeal to students and scholars in economic history disaster studies management public policy and related disciplines The comparison of crisis and disaster management is also essential reading for policy makers Cultures and Disasters Fred Krüger, Greg Bankoff, Terry Cannon, Benedikt Orłowski, E.
