Atlantis Silva Rofert, The story of Atlantis begins not with ancient ruins discovered beneath the waves but with the brilliant mind of a Greek philosopher walking through the marble halls of Athens around 360 BCE Plato student of Socrates and teacher of Aristotle crafted what would become one of history's most enduring mysteries when he penned the dialogues Timaeus and Critias In these works he described a magnificent island civilization that existed nine thousand years before his time a utopian society that fell into moral decay and was subsequently destroyed by the gods in a single day and night of earthquakes and floods Plato's account was vivid and detailed He described Atlantis as a naval power located beyond the Pillars of Hercules modern day Strait of Gibraltar The island was larger than Libya and Asia combined organized in concentric circles of land and water At its center stood a magnificent temple dedicated to Poseidon god of the sea surrounded by walls plated with brass tin and the mysterious metal orichalcum which gleamed like fire The Atlanteans were described as a hybrid race descended from the union of Poseidon and a mortal woman named Cleito According to Plato's narrative Atlantis was initially a paradise of justice and virtue The people were noble wise and prosperous They possessed advanced technology and knowledge that allowed them to create a sophisticated civilization with impressive architecture efficient agriculture and powerful naval forces The island was blessed with abundant natural resources including precious
