A World History Of Art Hugh Honour John Fleming:

A World History of Art Hugh Honour, John Fleming, 1984 *A World History of Art* Hugh Honour, John Fleming, 2005

Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's artistic heritage. From our paleolithic past to our digitised present every continent and culture is covered in an articulate and well balanced discussion. In this Seventh Edition the text has been revised to embrace developments in archaeology and art historical research while the renowned contemporary art historian Michael Archer has greatly expanded the discussion of the past twenty years providing a new perspective on the latest developments. The insight, elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations half of which are now in colour. These images together with the numerous maps and architectural plans have been chosen to represent the most significant chronological, regional and individual styles of artistic expression.

A World Art History and Its Objects David Carrier, 2008-11-28

Is writing a world art history possible? Does the history of art as such even exist outside the Western tradition? Is it possible to consider the history of art in a way that is not fundamentally Eurocentric? In this highly readable and provocative book David Carrier, a philosopher and art historian, does not attempt to write a world art history himself. Rather, he asks the question of how an art history of all cultures could be written or whether it is even possible to do so. He also engages the political and moral issues raised by the idea of a multicultural art history. Focusing on a consideration of intersecting artistic traditions, Carrier negotiates the way meaning and understanding shift or are altered when a visual object from one culture, for example, is inserted into the visual tradition of another culture.

A World Art History and Its Objects proposes the use of temporal narrative as a way to begin to understand a multicultural art history.

Connectivity and Global Studies Jan Nederveen Pieterse, 2021-02-19

This textbook provides readers with evocative and analytical accounts of social processes that are linked to globalization and connectivity, which includes a wide range of multi-centred connections in history, DNA analysis, technology, art, populism and political economy. Rather than globalization, Nederveen Pieterse focuses on connectivity. His approach to globalization differs from both structuralist accounts of the world system and the institutionally centred focus of much work in international studies. This synthesis will provide a new resource to reconstruct theoretical approaches to globalization and global studies. Fluently written, clearly organized and with an interdisciplinary approach, the book will be accessible to upper division undergraduates and graduates in social sciences, including students and researchers from the fields of sociology, politics, political economy, development studies and international relations.
