The Arithmetica of Diophantus Jean

Christianidis, Jeffrey Oaks, 2022-11-01 This volume offers an English translation of all ten extant books of Diophantus of Alexandria's *Arithmetica* along with a comprehensive conceptual historical and mathematical commentary Before his work became the inspiration for the emerging field of number theory in the seventeenth century Diophantus ca 3rd c CE was known primarily as an algebraist This volume explains how his method of solving arithmetical problems agrees both conceptually and procedurally with the premodern algebra later practiced in Arabic Latin and European vernaculars and how this algebra differs radically from the modern algebra initiated by François Viète and René Descartes It also discusses other surviving traces of ancient Greek algebra and follows the influence of the *Arithmetica* in medieval Islam Byzantium and the European Renaissance down to the 1621 publication of Claude Gaspard Bachet's edition After the English translation the book provides a problem by problem commentary explaining the solutions in a manner compatible with Diophantus's mode of thought The *Arithmetica* of Diophantus provides an invaluable resource for historians of mathematics science and technology as well as those studying ancient Greek medieval Islamic and Byzantine and Renaissance history In addition the volume is also suitable for mathematicians and mathematics educators

Seeing Islam as Others Saw It: A Survey and Evaluation of Christian, Jewish and Zoroastrian Writings on Early Islam Robert G. Hoyland, 2014-01-10 This book offers a new approach to the vexing question of how to write the early history of Islam The first part discusses the nature of the Muslim and non Muslim source material for the seventh and eighth century Middle East and argues that by lessening the divide between these two traditions which has largely been erected by modern scholarship we can come to a better appreciation of this crucial period The second part gives a detailed survey of sources and an analysis of some 120 non Muslim texts all of which provide information about the first century and a half of Islam roughly A D 620-780 The third part furnishes examples according to the approach suggested in the first part and with the material presented in the second part how one might write the history of this time The fourth part takes the form of excurses on various topics such as the process of Islamization the phenomenon of conversion to Islam the development of techniques for determining the direction of prayer and the conquest of Egypt Because this work views Islamic history with the aid of non Muslim texts and assesses the latter in the light of Muslim writings it will be essential reading for historians of Islam Christianity Judaism or Zoroastrianism indeed for all those with an interest in cultures of the eastern Mediterranean in its traditional phase from Late Antiquity to medieval times
