Archaeologies of Vision Gary Shapiro, 2003-05-15 While many acknowledge that Friedrich Nietzsche and Michel Foucault have redefined our notions of time and history few recognize the crucial role that the infinite relation between seeing and saying plays in their work Shapiro reveals the full extent of Nietzsche and Foucault's concern with the visual The Archaeology of Foucault Stuart Elden, 2022-12-01 On 20 May 1961 Foucault defended his two doctoral theses on 2 December 1970 he gave his inaugural lecture at the Collège de France Between these dates he published four books travelled widely and wrote extensively on literature the visual arts linguistics and philosophy He taught both psychology and philosophy beginning his explorations of the question of sexuality Weaving together analyses of published and unpublished material this is a comprehensive study of this crucial period As well as Foucault's major texts it discusses his travels to Brazil Japan and the USA his time in Tunisia and his editorial work for Critique and the complete works of Nietzsche and Bataille It was in this period that Foucault developed the historical philosophical approach he called archaeology the elaboration of the archive which he understood as the rules that make possible specific claims In its detailed study of Foucault's archive the book is itself an archaeology of Foucault in another sense both excavation and reconstruction This book completes a four volume series of major intellectual histories of Foucault Foucault's Last Decade was published by Polity in 2016 Foucault The Birth of Power followed in 2017 and The Early Foucault in 2021 Foucault's Philosophy of Art Joseph J. Tanke, 2009-08-30 Offers the first complete examination of Foucault's reflections on visual art leading to new readings of his major texts

Nietzsche's Earth Gary Shapiro, 2016-09-09 We have Nietzsche to thank for some of the most important accomplishments in intellectual history but as Gary Shapiro shows in this unique look at Nietzsche's thought the nineteenth century philosopher actually anticipated some of the most pressing questions of our own era Putting Nietzsche into conversation with contemporary philosophers such as Deleuze Agamben Foucault Derrida and others Shapiro links Nietzsche's powerful ideas to topics that are very much on the contemporary agenda globalization the nature of the livable earth and the geopolitical categories that characterize people and places Shapiro explores Nietzsche's rejection of historical inevitability and his idea of the end of history He highlights Nietzsche's prescient vision of today's massive human mobility and his criticism of the nation state's desperate efforts to sustain its exclusive rule by declaring emergencies and

states of exception Shapiro then explores Nietzsche's vision of a transformed garden earth and the ways it sketches an aesthetic of the Anthropocene. He concludes with an explanation of the deep political structure of Nietzsche's philosophy of the Antichrist by relating it to traditional political theology. By triangulating Nietzsche between his time and ours between Bismarck's Germany and post 9/11 America, Nietzsche's Earth invites readers to rethink not just the philosopher himself but the very direction of human history.

Art and Truth after Plato Tom Rockmore, 2024-05-31. Despite its foundational role in the history of philosophy, Plato's famous argument that art does not have access to truth or knowledge is now rarely examined in part because recent philosophers have assumed that Plato's challenge was resolved long ago. In *Art and Truth after Plato*, Tom Rockmore argues that Plato has in fact never been satisfactorily answered and to demonstrate that he offers a comprehensive account of Plato's influence through nearly the whole history of Western aesthetics. Rockmore offers a cogent reading of the post-Platonic aesthetic tradition as a series of responses to Plato's position, examining a stunning diversity of thinkers and ideas. He visits Aristotle's *Poetics*, the medieval Christians, Kant's *Critique of Judgment*, Hegel's phenomenology, Marxism, social realism, Heidegger, and many other works and thinkers, ending with a powerful synthesis that lands on four central aesthetic arguments that philosophers have debated. More than a mere history of aesthetics, *Art and Truth after Plato* presents a fresh look at an ancient question, bringing it into contemporary relief.

Watching Babylon Nicholas Mirzoeff, 2012-10-12. Groundbreaking and compelling, *Watching Babylon* examines the experience of watching the war against Iraq on television, on the internet, in the cinema, and in print media. Mirzoeff shows how the endless stream of images flowing from the Gulf has necessitated a new form of visual thinking, one which recognises that the war has turned images themselves into weapons. Drawing connections between the history and legend of ancient Babylon, the metaphorical Babylon of Western modernity, and everyday life in the modern suburb of Babylon, New York, Mirzoeff explores ancient concerns which have found new resonance in the present day. In the tradition of Walter Benjamin, *Watching Babylon* illuminates the Western experience of the Iraqi war and makes us re-examine the very way we look at images of conflict.

Metamorphosis David Gallagher, 2009. The origins of selected instances of metamorphosis in Germanic literature are traced from their roots in Ovid's *Metamorphoses*, grouped roughly on an ascending evolutionary scale: invertebrates, birds, animals, and mermaids. Whilst a broad range of mythological, legendary, fairytale, and folktale traditions have played an appreciable part, Ovid's *Metamorphoses* is still an important comparative analysis and reference point for nineteenth and twentieth-century German language narratives of transformations. Metamorphosis is most often used as an index of crisis: an existential crisis of the subject, or a crisis in a society's moral, social, or cultural values. Specifically selected texts for analysis include Jeremias Gotthelf's *Die schwarze Spinne* (1842) with the terrifying metamorphoses of Christine into a black spider; the metamorphosis of Gregor Samsa in Kafka's *Die Verwandlung* (1915); ambiguous metamorphoses in E. T. A. Hoffmann's *Der goldne Topf* (1814); Hermann Hesse's *Piktors Verwandlungen* (1925); *Der Steppenwolf* (1927); and Christoph Ransmayr's *Die letzte*

Welt 1988 Other mythical metamorphoses are examined in texts by Bachmann Fouqu Fontane Goethe Nietzsche Nelly Sachs Thomas Mann and Wagner and these and many others confirm that metamorphosis is used historically scientifically for religious purposes to highlight identity sexuality a dream state or for metaphoric metonymic or allegorical reasons [The Routledge Companion to Philosophy in Organization Studies](#) Raza Mir, Hugh Willmott, Michelle Greenwood, 2015-11-06 The Routledge Companion to Philosophy in Organization Studies provides a wide ranging overview of the significance of philosophy in organizations The volume brings together a veritable who's who of scholars that are acclaimed international experts in their specialist subject within organizational studies and philosophy The contributions to this collection are grouped into three distinct sections Foundations exploring philosophical building blocks with which organizational researchers need to become familiar Theories representing some of the dominant traditions in organizational studies and how they are dealt with philosophically Topics examining the issues themes and topics relevant to understanding how philosophy infuses organization studies Primarily aimed at students and academics associated with business schools and organizational research The Routledge Companion to Philosophy in Organization Studies is a valuable reference source for anyone engaged in this field

Pedagogies of the Image Hannah M. Tavares, 2016-06-15 This work considers the potential of photographs for orienting in a critical direction the scope questions and interests of the disciplinary conventions of the field of educational inquiry Visual objects may help illuminate broader socio historical events and logics that are deeply entwined with education yet remain marginal to or outside of what constitutes its domain of study In this work photographic images are treated as resources for re visioning the founding disciplinary objects of educational studies by reorienting its proper objects of study traditional archives persistent categories frames of reference and accepted portals of research and inquiry A theoretic framing shapes the question taken up in this work How might an engagement with photo archives open new horizons in the study of education from a postfoundationalist multi theoretic and cross disciplinary perspective The author constructs a rather unconventional vantage point to explore this question that opens on to the discursive spaces of three photographs made of three women in the years 1897 1949 and 1966 The photographs are analysed from three theoretic approaches First it is indicated how each photographic image not only marks a relationship to the past the present and the future but to the rules and conventions of photographic practices These particular images give an account of what both persists and exceeds the photographic image and permit to rewrite the bodies and lives pictured Second the subject matter of each photographic image while singular and local bears witness to the complex network of racial patriarchal and colonial logics and their profound imbrication with a technically mediated inscription For all their singularity the photographs cannot but evoke their relation to the deeply historical character of photography Finally the photographs make possible an account of broader occurrences subterranean histories contexts and differently situated experiences that illuminate much like the principle of montage a sequence of overlapping events crosscutting with one another consequently throwing open the possibility of responding to and transforming the histories and archives we are given This book *Pedagogies of the Image* is a winner of the 2017 American Educational Studies Association Critics Choice Award

The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault's genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e g the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to more advanced audiences interested in the current state of the art in biopolitics studies
