Charles,2003-03-30 This book presents 18 essays by leading scholars covering mortuary analysis the archaeology of foraging and agricultural societies cultural evolution and archaeological method and theory which transcend the processual postprocessual debate in archaeology and provide examples of how archaeologists think about and go about studying the past As archaeology encounters the 21st century debate over the nature of the discipline dominates professional discourse Archaeologists are embattled over isms processualism postprocessualism scientism and humanism are ubiquitous buzzwords in the literature Yet archaeology is a craft practiced by individuals learned from and influenced by other individuals Sometimes a peson through sheer force of intellectual spirit rises above the debate to make a mark on the field in ways that cross out schools paradigms and factions It is fitting to look back at the influence one such individual has had on archaeological methods theory data collection and syntheses over the last half century This volume draws on the experience of students and colleagues who worked with and were strongly influenced by James A Brown s approach to the past The volume is divided into five categories each reflecting one distinctive facet of Brown s affect on archaeology mortuary analysis foraging and horticultural societies complex agriculturalists proto historic and historic societies and method and theory These diverse categories with articles by archaeologists of many backgrounds are drawn together by the threads of Brown s intellectual legacy Not all authors here are in agreement with Brown s views on their subjects but all acknowledge that his work in the area sets a standard that needs to be met if one is to succeed Archaeological Theory Today Ian Hodder,2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past

Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to external influences as well as the desire to contribute to wider debates The contributors examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of Archaeological Theory Today will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally

Archaeological Chemistry A Mark Pollard, Carl Heron, Ruth Ann Armitage, 2020-08-28 The use of chemistry in archaeology can help archaeologists answer questions about the nature and origin of the many organic and inorganic finds recovered through excavation providing valuable information about the social history of humankind This textbook tackles the fundamental issues in chemical studies of archaeological materials Examining the most widely used analytical techniques in archaeology the third edition of this comprehensive textbook features a new chapter on proteomics capturing significant developments in protein recognition for dating and characterisation The textbook has been updated to encompass the latest developments in the field The textbook explores several archaeological investigations in which chemistry has been employed in tracing the origins of or in studying artefacts and includes chapters on obsidian ceramics glass metals and resins It is an essential companion to students in archaeological science and chemistry as well as to archaeologists and those involved in conserving human artefacts

Cinematosophical Introduction to the Theory of Archaeology Aleksander Dzbyński, 2020-02-03 What is archaeology A research field dealing with monuments A science A branch of philosophy Dzbyński suggests the simple but thoughtful equation Archaeology = History + Knowledge This book consists of 8 chapters presenting a collection of characteristic philosophical attitudes important for archaeology It discusses the historicity of archaeological sources the source of the algorithmic approach in archaeological reasoning and the accuracy of logical and irrational thinking In general this book is concerned with the history of archaeologists search for a suitable methodology All these issues are discussed in relation to two main intellectual trends of archaeology to the present day processual and post processual archaeology Processualism introduced and developed the idea of algorithmic and universal reasoning in archaeology while post processualism focused attention on the individual value of a monument and the archaeologist himself These are still two foundations on which the present knowledge of the past is based and thus their defining role cannot be overestimated An additional layer of narrative visible right from the beginning of the book is the gradual discovery of the relationship between archaeology and popular culture especially film and literature Its aim is both illustration and explanation It is intended that the reader receives not only information and knowledge but also a deeper emotional reference which is connected with the reception of works of art

Archaeological Theory and the Politics of Cultural Heritage Laurajane Smith, 2004-08-02 This is a much needed survey of how relationships between indigenous peoples and the archaeological establishment have got into difficulties and a pointer towards how things could move forward

Archaeology: An Introduction Kevin Greene, 2002-11-01 This fourth edition constitutes the most extensive reshaping of the text to date In a lucid and accessible style Kevin Greene explains the discovery and excavation of sites outlines major dating methods gives clear explanations of scientific techniques and examines current theories and controversies New features include a completely new user friendly text design with initial chapter overviews and final conclusions key references for each chapter section an annotated guide to further reading a glossary refreshed illustrations case studies and examples bibliography and full index a new companion website built for this edition providing hyperlinks from contents list to individual chapter summaries which in turn link to key websites and other material an important new chapter on current theory emphasizing the richness of sources of analogy or interpretation available today This new edition provides students with a sound introduction to the field of archaeology and guides them towards further study
