*Deconstructing Archetype Theory* Christian Roesler,2023-08-04 This important book offers a critical and timely

reassessment of one of the cornerstones of analytical psychology Jung's concept of archetypes Exploring not only Jung's original writings but also the range of interpretations used by Jungian scholars today the book argues that Jung's conceptualization of archetype theory is not a single coherent theory rather it is four different theories which must be understood separately Roesler goes on to deconstruct these four ideas the biological the anthropological the transcendental and the psychological in context with contemporary insights from each of these disciplines A thorough analysis of the state of knowledge in the respective disciplines i.e. biology anthropology religious and mythological studies makes clear that the claims archetype theory makes in these fields have no support and should be given up Deconstructing Archetype Theory concludes by arguing that a universal process of psychological transformation is the only part of archetype theory which should be maintained as it provides a map for psychotherapy Rigorous and insightful this is a book that will fascinate scholars and practitioners of analytical psychology as well as anyone with an interest in Jung's original work Archetypes and Motifs in Folklore and Literature, 2005

*The Monstered Self* Eduardo González, 1992 Viewing stories and novels from an ethnographic perspective Eduardo González here explores the relationship between myth ritual and death in writings by Borges Vargas Llosa Cortázar and Roa Bastos He then weaves this analysis into a larger cultural fabric composed of the works of Chaucer Shakespeare Joyce Benjamin H. G. Wells Kafka Poe and others What interests González is the signature of authorial selfhood in narrative and performance which he finds willfully and temptingly disfigured in the works he examines horrific and erotic subservient and tyrannical charismatic and repellent Searching out the personal image and plot González uncovers two fundamental types of narrative one that strips character of moral choice and another in which characters' choices deprive them of personal autonomy and hold them in ritual bondage to a group Thus *The Monstered Self* becomes a study of the conflict between individual autonomy and the stereotypes of solidarity Written in a characteristically allusive elliptical style and drawing on psychoanalysis religion mythology and comparative literature *The Monstered Self* is in itself a remarkable performance one that will engage readers in anthropology psychology and cultural history as well as those specifically interested in Latin American narrative

*Holistic Education and Embodied Learning* John P. Miller, Kelli Nigh, 2017-03-01. Learning often begins with an experience in the body. Our body can tighten or feel expansive depending on different learning contexts. This experience of learning in the body is crucial to holistic education. This book explores embodied learning from several perspectives. This first section explores how psychology can inform us about embodied learning; for example, the work of Carl Jung and Wilhelm Reich devoted much of their thinking to how energy manifests itself in the body. Meditation and movement are also examined as ways of embodied learning; for example, Dalcroze, a form of movement education, is presented within the context of whole-person education. The book also presents schools where embodied learning is nurtured. Waldorf education is discussed as well as a public school in Toronto where the body is central to holistic education. The book also presents visions of embodied learning. John Miller presents a holistic vision of teacher education, and Tobin Hart, who has written extensively in this field, writes about the embodied mind. Embodied learning is an emerging area of inquiry in holistic education, and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners.
