Illustrated Glossary of Southern African Architectural Terms, English-isiZulu Franco Frescura, Philisiwe Joyce Myeza, 2016 Since 1994 South Africa has undergone a steady erosion of its indigenous built environment with a concomitant loss of indigenous building technology and its specialised terminology This glossary is based on the premise that readers cannot understand the culture of a people unless they have a grasp of the nuances and hidden meanings of the language The authors bring together in one volume the terminologies that are used by southern Africa's rural builders The terminology used by indigenous builders is included here as well as the terminology used by subsequent colonial white settlers including buildings of the so-called Cape Dutch English Georgian Victorian and Indian Traditions The text is set out in alphabetical order It comprises each term in its original language its translation where appropriate into isiZulu and its definition in English and isiZulu One of the strengths of English isiZulu Glossary of Architectural Terms is its visual component of accompanying sketches that expertly illustrate the terms This book is designed not only to assist in the teaching of architecture but also to aid others who are interested in the field Researchers and practitioners in disciplines such as anthropology archaeology culture studies and building science will find it a valuable addition to their libraries Series UKZN Bilingual Glossary Series Subject Architecture African Studies Anthropology Art History

Modernism in Africa Docomomo International, 2024-12-16 Many African countries are home to extraordinary architecture that is virtually unknown There are interpretations of Art Deco International Style Brutalism as well as of African vernacular architecture Climate responsive buildings with a fluidity of interior and exterior spaces play a large role While many of these 20th century architects were of European origin they were deeply influenced by their surroundings and found original site specific expressions often in collaboration with African architects A focus of the construction activities were educational buildings which played an important role for these young nations that mostly gained their independence in the 1960s While some of the documented buildings have been restored others are still awaiting reconstruction Well known contributors include among others Uta Pottgiesser TH OWL TU Delft Ana Tostes Lisbon University Ola Uduku University of Liverpool The stunning photography by Jean Molitor takes the reader on a journey across the continent Documentation of over 60 buildings from eight countries with new drawings and photographs

RIBA Climate Guide Mina Hasman, 2023-04-21 Climate change is a threat to humankind which requires immediate action The built environment has a vital role to play in responding to the climate emergency There is a pressing need for architects to acquire the requisite skills and knowledge to design buildings that deliver sustainable outcomes meeting the RIBA 2030 Climate Challenge and mandatory competence in climate literacy Equipping you with the key information that built environment professionals require to halt climate change and mitigate its impacts in your day to day work this book is organised around six overarching topics 1 Human Factors 2 Circular Economy 3 Energy and Carbon 4 Water 5 Ecology and Biodiversity 6

Africa's Buildings Itohan I. Osayimwese, 2025-09-23 A groundbreaking history of Africa's looted architectural heritage and a bold proposal for the repatriation of the continent's stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa's Buildings traces the history of the collection and distribution of African architectural fragments documenting the brutality of the colonial regimes that looted Africa's buildings and addressing the ethical questions surrounding the display of these objects Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western central and eastern regions of the continent She describes how collectors employed violent means to remove elements such as columns and door panels from buildings and how these methods differentiated architectural collecting from conventional collecting She shows how Western collectors mischaracterized building components as ornament erasing their architectural character and concealing the evidence of their theft Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals scholars have yet to fully grasp the variety and character of African architecture Richly illustrated Africa's Buildings uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history one in which they champion the repatriation of Africa's architectural heritage and restitution for African communities

frameworks for the study of the built environment are developed This is a very relevant contribution at this time especially as cities will most probably go through transformations in the post COVID 19 era Our first line of defense against this public health crisis will be in areas of poverty with people who have generally been excluded and urban practices that have been undocumented or labeled as informal The main thesis of the manuscript is that space and power are strongly linked in cities The research results prevalent in the book are original and while the authors consult widely across disciplines the themes are firmly rooted in the built environment fields with a focus on the architectural discipline **Hidden Pretoria** Johan

Swart,2019-10-01 Despite being South Africa s capital city Pretoria has often played a supporting role to bold and brash Johannesburg and Cape Town s cosmopolitan charms However when it comes to architectural heritage the Jacaranda City is well endowed From the skyline dominating Union Buildings and Voortrekker Monument to the imposing edifices of its administrative precincts Pretoria might be deserving of a second moniker the city of sandstone brick and granite But when you look beyond the impressive fa ades soaring columns and linear planes of buildings that were intended to convey power and authority you ll find light filled interiors embellished with decorative touches that are only hinted at from the outside Murals mosaics domes galleries stained glass windows gleaming brass and impressive woodwork are often hidden from view behind doors that are closed to the public And even those museums buildings and places of worship that are open to all have noteworthy architectural and design features that are easily overlooked The history of the city and of the country has been played out in many of the buildings featured in Hidden Pretoria This book captures facets of our diverse heritage historic and contemporary so that a new generation might recognise the need to embrace the past in order to build our common future

Representing Landscapes: Visualizing Climate Action Nadia Amoroso,2024-07-31 This book provides an in depth overview of graphic and visual communication styles for conveying climate change and climate action within the landscape architectural profession and in academia The book features visualizations of climate adaptation and resilience developed by award winning landscape architects and academics from Canada the United States the United Kingdom The Netherlands Denmark Germany Italy France Finland South Africa Singapore and China Representing Landscapes Visualizing Climate Action illustrates the imaginative ways in which climate action and climate resilient concepts are visually presented communicated and perceived The book will be especially valuable for students and practitioners in landscape architecture urban planning and related fields to understand how to visually capture climate change issues and design solutions and to deliver this message to the public
