present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place. He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs. Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract from the architect's ideas, analyzing the model as a generative tool and investigating allegorical, analogical, and anagogical interpretations of models. Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal, tactile, and sensory complexity and beyond that that the manipulation, play, experimentation, and dreaming enabled by models allow us to imagine architecture in new ways.
