di stili storici l'architetto belgradese reinterpreta l'architettura funeraria antica affiancando lo spazio memoriale al problema della monumentalità. L'argomentazione del libro dal piano simbolico si sposta alla concretezza del manufatto. Combinando materiali d'archivio la traduzione di testi dal serbo croato fino ad ora inediti in italiano e l'esperienza diretta il libro identifica alcuni temi validi e ancora spendibili per la progettazione di uno spazio della memoria. **Comparison** Fabrizia

Berlingieri, Francesca Zanotto, 2020 Design Driven Research encompasses many different forms of research in which architectural design and artistic practices and the results thereof are implemented as a means to generate and disseminate new knowledge. This includes contemporary alternative formulations of the field like Artistic Research, Research by Design, Practice Based Led Research, Creative Practice Research. CA2RE is a joint Erasmus strategic partnership of nine European universities in association with EAAE, ELIA and ARENA and it supports early career researchers and Ph.D. students to improve the quality of their research. CA2RE explicates the transformative and innovative power of highly individual strategies in artistic research, the diversity of research traditions and the integrative nature of architectural design research, able to face the contemporary knowledge fragmentation from humanities, social sciences and technology. Along with the CA2RE timeline project, the focus of Milano conference narrows by comparing design strategies and tactics applied to highlight common approaches and methodological specificities within the consortium and the broader community involved.

Architecture Drawing Topology Cort Ross Dinesen,Inger Berling Hyams,Morten Meldgaard,Morten Michelsen,Henrik Oxvig,2017-10 This book presents contributions of drawing and text along with their many relationalities from ontology to history and vice versa in a range of reflections on architecture drawing and topology We hope to thereby indicate the potential of the theme in understanding not only the architecture of today but perhaps most importantly also creating and producing architecture that is contemporaneous and reacts to the radical changes of the physical world which surrounds us in the increasingly artificial measures of new materialities and understandings thereof The contributions range from the

intricate issues of the imagination and the moving ratio in the topological culture over urban topology diagrammatisation
