## **Archival Resources Republican China America:**

*Archival Resources of Republican China in North America* Chengzhi Wang, Su Chen, 2015-12-08 North America maintains the largest collection of archival materials relating to the Chinese Republican era 1911-1949 outside of China. Most of the archival materials are also unique and the collections contain special materials supplementing historical records in China and Taiwan. In many cases, North America's holdings represent the best and only public access to the tumultuous Republican government and society of the first half of the twentieth century. An essential guide for researchers and students of Republican China, this volume presented in both English and Chinese covers personal papers, correspondences, memoirs, diaries, photographs, moving images, and other materials held at academic and research institutions across the United States and Canada. It includes concise descriptions of the people, organizations, and events connected to each entry and notes when certain collections are closely related and when materials are digitized for online access. The book corrects common errors associated with the library records of many archives and updates or completes information on the objects of these records. More than a straightforward itemization, this book adds significant depth to any research on the history and global import of China's modern development. **Knowledge, Power, and Networks** Cécile Armand, Christian Henriot, Huei-min

Sun, 2022-09-12 In the past decades, the world has watched the rise of China as an economic and military power and the emergence of Chinese transnational elites. What may seem like an entirely new phenomenon marks the revival of a trend initiated at the end of the Qing. The redistribution of power, wealth, and knowledge among the newly formed elites matured during the Republican period. This volume demonstrates both the difficulty and the value of rethinking the elites in modern China. It establishes that the study of the dynamic tensions within the elite and among elite groups in this epochal era is within reach if we are prepared to embrace forms of historical inquiry that integrate the abundant and even limitless historical resources and to engage with the rich repertoire of digital techniques, instruments available, and question our previous research paradigms. This renewed approach brings historical research closer to an integrative, data-rich history of modern China. **State and Economy in Republican China** William C. Kirby, 2020-05-11 This manual for students focuses on archival research in the economic and business history of the Republican era 1911-1949. Following a general discussion of archival research and research aids for the Republican period, the handbook introduces the collections of archives in the People's Republic of China and the Republic of China on Taiwan that contain materials in the areas of economics and business, with data on the history of the archives, descriptions of their holdings, and publications on their collections. The second half of the work consists of guided readings in Republican era documents such as government decrees, regulations, and business letters, with complete vocabulary lists and explanations of terms. Also included with the handbook are facsimile reproductions of these documents. [Twentieth Century China](#) James H. **Techno-Nationalism** Alex Capri,2024-09-23 The essential book on technology related competition between nations and its impact on the world Nations have long sought to use technology as a power multiplier for their own ambitions In the twenty first century at a time of unprecedented innovation the United States and China are in a race to achieve technological superiority But how will this affect long standing trade ties and the international landscape Techno nationalism holds that a nation s economic strength and its national security even its social stability are linked to the technological prowess of its institutions and enterprises From artificial intelligence and biotechnology to semiconductors and quantum science nations that fall behind in the technology race risk becoming permanent losers with potentially catastrophic consequences After decades of trade liberalization and free flowing investment into China a paradigm shift amongst a bloc of like minded mostly Western countries has set in motion epic change Techno nationalism is reorganizing the global economy Alex Capri who spent decades as a trade and supply chain professional in China and throughout the world lays out the dynamics of this change and its underlying themes from the paradox facing U S China commercial linkages to the grey zones in which states and firms must now try to coexist He provides a realist s perspective of both the challenges and opportunities facing international actors Regarding the elements of techno nationalism Capri paints a masterful picture of the strategic decoupling of supply chains and the re shoring of key manufacturing ecosystems such as semiconductors He provides an illuminating account of the geopolitics of data and the fragmentation of the digital landscape as well as the bifurcation of financial markets academia and R D around Chinese and American spheres of influence These themes carry through to Capri s fascinating accounts of the modern day space race and space based Internet undersea cables hypersonic warfare the AI arms race drones and robotics The book s clear explanations of semiconductors and their importance is highly useful

**Cuba's Foreign Policy in Global Solidarity Organizations** Lasse B. Lassen,2024-12-23 This book analyzes the influence of the Cuban Revolutionary Government on the evolution of the Afro Asian Peoples Solidarity Organization AAPSO The author argues that Cuba s accession to AAPSO and the convocation of two solidarity conferences 1966 1967 in Havana initiated a political shift for the organization The Cuban Revolutionary Government thus promoted the inclusion of Latin American delegations that represented their countries leftist and pro Cuban dissidence as well as rural guerilla movements Adding to that Fidel Castro s independent stance towards AAPSO s two main financiers the USSR and the PR China fostered a gradual emancipation of the postcolonial organization from the dominance of its sponsors The book

offers a better understanding of the theoretical foundations of Cuba's foreign policy and explains how Havana used the two solidarity conferences to better the island's international prestige at times of diplomatic isolation. Retracing the diplomatic influence of a small but key diplomatic actor of the Cold War, this study will appeal to postcolonial and Latin America scholars as well as to academic researchers in contemporary history and political sciences. *The Field of Chinese Language Education in the U.S.* Vivian Ling, 2018-02-13. This book will be the first account of the development of Chinese as a foreign language in the U.S. as it interacts with the relevant entities in China and beyond. There are virtually no systematic retrospective reflections on the field outside of the greater China region, and yet over the past decades the field has grown by leaps and bounds, and it is critical now that we pause to reflect on what has happened and what we can learn from the past. The contributors are among some of the most influential pioneers in the field whose entire academic lives have been dedicated to its development. *The Field of Chinese Language Education in the U.S. A Retrospective of the 20th Century* is aimed at those who are currently engaged in Chinese language education as teachers or as students.
