Music and Media in the Arab World Michael Frishkopf, 2010-09-01 Since the turn of the twentieth century the dramatic rise of mass media has profoundly transformed music practices in the Arab world Music has adapted to successive forms of

media dissemination from phonograph cylinders to MP3 each subjected to the political and economic forces of its particular era and region. Carried by mass media, the broader culture of Arab music has been thoroughly transformed as well. Simultaneously, mass mediated music has become a powerful social force. While parallel processes have unfolded worldwide, their implications in the Arabic speaking world have thus far received little scholarly attention. This provocative volume features sixteen new essays examining these issues, especially televised music and the controversial new genre of the music video. Perceptive voices, both emerging and established, represent a wide variety of academic disciplines. Incisive essays by Egyptian critics display the textures of public Arabic discourse to an English readership. Authors address the key issues of contemporary Arab society: gender and sexuality, Islam, class, economy, power, and nation, as refracted through the culture of mediated music. Interconnected by a web of recurrent concepts, this collection transcends music to become an important resource for the study of contemporary Arab society and culture.

Handbook of Research on Political Activism in the Information Age Solo, Ashu M. G., 2014-05-31. Technology and particularly the Internet has caused many changes in the realm of politics. Mainstream media no longer has a monopoly on political commentary as social media blogs and user generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The Handbook of Research on Political Activism in the Information Age includes progressive research from more than 39 international experts at universities and research institutions across 15 different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students, and professionals working in the fields of politics, government, media, and communications, and Internet marketing.

Online Journalism in Africa Hayes, Mawindi Mabweazara, Okoth Fred Mudhai, Jason Whittaker, 2014-01-21. Very little is known about how African journalists are forging new ways to practise their profession on the web. Against this backdrop, this volume provides contextually rooted discussions of trends, practices, and emerging cultures of web based journalism across the continent, offering a comprehensive research tool that can both stand the test of time as well as offer researchers, particularly those in the economically developed Global North, models for cross cultural comparative research. The essays here deploy either a wide range of evidence or adopt a case study approach to engage with contemporary developments in African online journalism. This book thus makes up for the gap in cross cultural studies that seek to understand online journalism in all its complexities.
