textbook and included student and instructor materials are a complete semester's curriculum. Instructors receive an instructor's manual, lecture materials, check prints of AutoCAD dwg files, prototype drawings for assignments, a syllabus, tests, quizzes, answer keys, and sketching and traditional drafting files in doc and PDF format. With the textbook, students gain access to an extensive library of video tutorials. They also receive AutoCAD prototype drawings for each CAD assignment, lettering practice sheets, and multi-view sketching grid sheets in PDF format.

Broad Appeal Students taking introductory technical drawing classes usually have diverse career interests. Traditional technical drawing texts, which focus solely on mechanical drawing projects, hold little interest for these students. So *Technical Drawing 101 with AutoCAD* includes projects in which students create working drawings for a mechanical assembly as well as for an architectural project. Learners will master these topics with the same clear instruction and step-by-step process that is featured in the rest of the textbook. The newly added chapter on civil drafting touches on types of civil drawings, civil bearings, courses and units, and concludes with a mortgage survey project. Another brand new chapter on electrical and electronics drafting explains the types of working drawings and graphics found in this field: circuits, symbols, and components, and schematic diagrams, followed by an FM tuner project. The inclusion of these chapters helps capture the interest of more students while adding even more multidisciplinary appeal to the text.

Video Tutorials The video tutorials that are included with this textbook are designed to get students comfortable with the user interface and demonstrate how to use many of AutoCAD's commands and features. The videos progress to more advanced topics that walk students through completing several of the projects in the book.

BOOK JACKET [Fair Housing Act Design Manual](#) United States. Department of Housing and Urban Development. Office of Housing, 1998. [Fundamentals of Innovative Sustainable Homes Design and Construction](#) Avi Friedman, 2023-06-26. This book offers ideas and practices on contemporary design concepts and illustrates them with plans and photographs of outstanding examples. Current planning and design modes of dwellings and neighborhoods are facing challenges of philosophy and form. Past approaches no longer sustain new demands and require innovative thinking. The need for a new outlook is propelled by fundamental changes that touch upon environmental, economic, and social aspects. The depletion of non-renewable natural resources and climate change are a few of the environmental challenges. Increasing costs of material, labor, land, and infrastructure have posed economic challenges, with affordability being paramount among them. Social challenges are also drawing the attention of designers, builders, and homeowners. Walkable communities, aging in place, and multigenerational living are some of the concepts considered. In addition, live work environments have become part of the economic reality for those who wish to work from home, which has become possible through digital advances. In recognition of the diverse career interests of our students, **Technical Drawing 101** includes projects in which students create working drawings for a mechanical assembly as well as for an architectural project. We include architectural drawing because our experience has shown that many, if not most, first semester drafting students are interested in careers in the architectural design field, and that a traditional technical drawing text which focuses solely on mechanical drawing projects holds little interest for these students. The multidisciplinary approach of this text and its supporting materials are intended to broaden the appeal of the curriculum and increase student interest, and it is hoped, future enrollments.

The authors have also created extensive video training: 120 videos, 17 hours total, that is included with every copy of the book.
