Architecture From Prehistory To Postmodernity Second Edition:

Architecture, from Prehistory to Postmodernity Marvin Trachtenberg, Isabelle Hyman, 2002 Moving back and forth between the long view of historical trends and close ups on major works and crucial architectural themes this insightful lively and original modern survey reinvigorates conventional period and thematic structures of architectural history and revitalizes the canon of great buildings Designed to help students understand and appreciate great architecture and its history the lavishly illustrated text explains specific qualities of periods in depth and the complex illuminating differences between them in social intellectual and aesthetic terms Exceptionally detailed coverage of the modern age 18th century to the present

Architecture, from Prehistory to Postmodernity Marvin Trachtenberg, Isabelle Hyman, 2002 Moving back and forth between the long shot on historical trends and close ups on major works and crucial architectural themes this insightful lively and original analysis also accepts the conventional period and thematic structures of architectural history and the canon of great buildings Designed to help readers understand and appreciate what great architecture is in its full dimensions of use structure and aesthetic qualities as well as its history this lavishly illustrated book explains specific qualities of each period and the often complex illuminating differences between the periods This comprehensive volume examines all aspects of architectural history from the Ancient world the Middle Ages the Renaissance and Baroque periods through the modern world For historians and architectural enthusiasts

Architectonics and Parametric Thinking Frank Jacobus, Angie Carpenter, Rachel Smith Loerts, Antonello Nunzio, Francesco Bedeschi, 2023-07-12 This book is an approachable guide for students and professionals to learn parametric modeling through the lens of architectonics allowing readers to pair fundamental ideas about architecture with parametric thinking Architectonics and Parametric Thinking begins by clearly positioning the potentials of parametric design through a series of chapters written by leaders in their respective industries This helps to situate the vast potential of parametric softwares allowing the reader to understand the full range of what is made possible by working computationally Following this theoretical introduction the book presents a manual that walks readers through the step by step construction of parametric modeling scripts built through an architectonic lens using clear compelling diagrams Each of these diagrams provide textual accompaniment that describes how each new portion of the script is transforming the algorithm as a whole as well as diagrams that show the physical transformation that is taking place as a result of the script s evolution Parametric modeling is radically transforming the design disciplines and will become the primary way designer s generate new products moving forward Written and expertly designed for architecture students and professionals this book provides an interactive approach to teaching the basics of parametric thinking in relation to architecture and design

What Architecture Means Denise Costanzo, 2015-07-24 What Architecture Means introduces you to architecture and allows you to explore the connections between design ideas and values across time space and culture It equips you to play an active and informed role in architecture either as a professional or as a consumer client and citizen By

analyzing famous and everyday buildings while presenting and questioning the positions of important architects and theorists this book will help you to evaluate and decide what qualities ideas and values you believe are important in architecture You ll learn How various definitions of architecture establish different relationships with all buildings and even non buildings How buildings express and accommodate ideas of the sacred the family and the community What an architect is and what priorities they bring to design and construction How an architect s expertise relates to that of the engineer and why these are distinct disciplines About values like beauty originality structural expression and cultural memory and their purpose in architectural design About the interests and ethical values that architects and architecture serves and promotes Topics include sacred spaces the house the city architects and engineers aesthetics and design originality and method technology and form memory and identity and power and politics

Architecture, from Prehistory to Post-modernism Marvin Trachtenberg, Isabelle Hyman, 1986 History of buildings groups of buildings the styles in which they were built and the architects responsible for them from Stonehenge to the present

Sacred Power, Sacred Space Jeanne Halgren Kilde, 2008 The author s main concern in this book is the dynamic character of Christianity and how church buildings shape and influence the religion She argues that a primary function of church buildings is to represent and reify three different types of power divine power personal empowerment and social power

Medieval Art Second Edition Marilyn Stokstad, 2021-12-24 This beautifully produced survey of over a thousand years of Western art and architecture introduces the reader to a vast period of history ranging from ancient Rome to the age of exploration The monumental arts and the diverse minor arts of the Middle Ages are presented here within the social religious and political frameworks of lands as varied as France and Denmark Spain and Turkey Marilyn Stokstad also teaches her reader how to look at medieval art which aspects of architecture sculpture or painting are important and for what reasons Stylistic and iconographic issues and themes are thoroughly addressed with attention paid to aesthetic and social contexts

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can

enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies ID ,2002 *Italy's Renaissance in Buildings and Gardens* Frederick Kiefer,2024-10-08 Palaces villas and churches These were the highlights of my first visit to Italy I took a lot of photos and looked forward to sharing them with friends and family Back home though I found that I didn t recall much about the places that impressed me Although I had the benefit of a half day guide in Rome Florence and Venice I sometimes had difficulty hearing what was said on crowded streets and busy interiors The guides were capable but had only enough time to mention a few major features As a rule they skimmed on actually describing buildings that intrigued me And so they were not especially helpful in providing the insights I wanted Upon my return I found myself wondering Where did the architects actually find their ideas What did they want to accomplish And what do their choices tell us about their time My sojourn in Italy would have been more satisfying if I had come away with a fuller account of what I had seen What I most needed was context This book supplies that context Contemplation of antiquity and the exchange of views among architects released a surge of intellectual energy not seen for a millennium a development that would never have happened so quickly were it not for Johannes Gutenberg s invention of printing with movable type This development in turn led to architects heightened self awareness of their collective enterprise They read what their fellow architects wrote and thereby gained in sophistication They were no longer merely masons They became architects in the modern sense They took pride in their achievements and shared a conviction that the visual culture they created was far superior to that of the previous thousand years Their embrace of classical civilisation had a visceral urgency Rome after all was a culture with a storied past peopled by larger than life figures To learn what the ancients had created in word or stone could supply a shortcut to wisdom And emulating the Romans would provide new models of aesthetic excellence This endeavour became known as the Renaissance or rebirth The Reformation however changed everything Martin Luther brought to issue a quandary How exactly was Christianity to be reconciled with the pagan past if at all Could one source of inspiration be sustained without compromising the other Religious reform questioned the aesthetic achievements of the previous hundred years The story of Renaissance architecture represents the effort to find an accommodation **Byzantium/Modernism** ,2015-06-29 Byzantium Modernism features contributions by fourteen international scholars and brings together a diverse range of interdisciplinary essays on art architecture theatre film literature and philosophy which examine how and why Byzantine art and image theory can contribute to our understanding of modern and contemporary visual culture Particular attention is given to intercultural dialogues between the former dominions of the Byzantine Empire with a special focus on

Greece Turkey and Russia and the artistic production of Western Europe and America Together these essays invite the reader to think critically and theoretically about the dialogic interchange between Byzantium and modernism and to consider this cross temporal encounter as an ongoing and historically deep narrative rather than an ephemeral or localized trend Contributors are Tulay Atak Charles Barber Elena Boeck Anthony Cutler Rico Franses Dimitra Kotoula Marie Jos Mondzain Myroslava M Mudrak Robert S Nelson Robert Ousterhout Stratis Papaioannou Glenn Peers Jane A Sharp and Devin Singh
