Mining a rich interdisciplinary mix of sources including stoneware jugs personal correspondence paintings inventories and literature written for the dining room this study offers a critical and entirely original examination of the function of early modern images for the people who owned and viewed them The study explores the emergence functions and material culture of the Antwerp dinner party during the heady days of the mid sixteenth century when Antwerp's art market was thriving and

a new wealthy non noble class dominated the city The author recontextualizes some of Bruegel s work within the cultural nexus of the dining room where material culture and theatrical performance met humanist wit and the desire for professional advancement The narrative also touches on the reception of Northern art in Lombardy on intersections among painting material culture and theater and on intellectual history

Handbook of Material Culture Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies

Mind, Materiality and History Christina Toren,2005-08-15 How do we become who we are How is it that people are so similar in the ways they differ from one another and so different in the ways they are the same Christina Toren s theory of mind as not only a physical phenomenon but an historical one sets out to answer these questions by examining how the material world of objects and other people informs the constitution of mind in persons over time This theory of embodied mind as a microhistorical process is set out in the first chapter providing a context for the nine papers that follow Questions explored include the way meaning making processes reference an historically specific world and are responsible at once for continuity and change how ritual informs children s constitution of the categories adults use to describe the world and how people represent their relationships with one another and in so doing come to embody history Mind Materiality and History has direct relevance to current debates on the nature of mind and consciousness and demonstrates the centrality of the study of children to social analysis It will be a valuable resource for students and scholars with an interest in anthropological theory and methodology as well as those engaged in material culture studies
