five years chances are you will only ever need to re oil your clock If the clock is allowed to run until it stops the only sure way to service it is to remove the works from its case dismantle the parts clean service and put the movement back together with fresh oil and correct adjustment      **Home Craftsman** ,1949      *Popular Science* ,1973-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
