Ethics in all its exemplary and exhausting forms matters. It deals with the most gripping question in public life: What is the right thing to do? The authors take on controversial issues from whistle blowing incidents to corruption exposés to explain how they arise and suggest what can be done about them. They start with the conceptual tools students need to evaluate an ethical dilemma then analyze individual decision making strategies and go on to assess institutional ethics programs. The emphasis is not only on the how to but also on the why. The ultimate goal is to bolster students confidence and prepare them for the ethical problems they will face in the future by equipping them with the conceptual frameworks and context to approach thorny questions and behave ethically.
