Advanced Automation for Tree Fruit Orchards and Vineyards Stavros G. Vougioukas,Qin Zhang,2023-05-23 Modern tree fruit orchards and vineyards constitute complex production systems that are exposed to highly dynamic and stochastic natural financial and societal forces and face demands for increased production using fewer resources with reduced

environmental impact Successful operation of orchards and vineyards under these conditions is practically impossible without careful and extensive use of state of the art automation technologies and careful planning of future operations e g training systems when replanting that can be enabled by knowledge of emerging technologies and future trends Also improvement of existing automation technologies and development of novel future systems cannot be accomplished without a working understanding of the tree and vine biological production systems their management needs and the capabilities and limitations of existing automation systems The book aims to provide the necessary knowledge to achieve the above goals in a way that can engage readers without engineering or horticultural backgrounds
